CONCLUSION	127
------------	-----

P-R-O-C-E-E-D-I-N-G-S

(10:01 a.m.)

MS. GRIMBALL: Good morning and welcome.

The Office of the United States Trade Representative, in conjunction with the Interagency Section 301 Committee, is holding these public hearings in connection with the Section 301 investigation of acts, policies, and practices of various economies related to the failure to impose and effectively enforce a prohibition on the importation of goods produced with forced labor.

The United States Trade Representative initiated these 60 investigations on March 12, 2026.

A notice of initiation was published in the Federal Register on March 17th, 2026. That notice invited written comments on investigations and announced these hearings. Specifically, the March 17th notice invited comment on a number of issues relating to whether the act, policies, and practices under investigation are actionable under Section 301 of the Trade Act of 1974, as amended.

Actionable matters under Section 301

1 include acts, policies, and practices of a foreign
2 country that are unreasonable or discriminatory and
3 that burden or restrict U.S. commerce.

4 In addition to comments on actionability,
5 USTR requested comments on what action, if any,
6 should be taken to address actionable matters. The
7 March 17th notice is available on the USTR webpage
8 under the Section 301 Investigations page and is
9 published in the Federal Register at 91 FR 12884.

10 The purpose of these hearings is to receive
11 public testimony regarding the issues raised in the
12 March 17th notice. The Section 301 Committee will
13 carefully consider today's testimony and all
14 written comments in response to the Federal Register
15 notice, including post-hearing rebuttal comments.

16 All written comments, including post-hearing
17 comments, are due May 6th, 2026.

18 After the Section 301 Committee has
19 completed its work, the Committee will make
20 recommendations to the U.S. Trade Representative
21 on whether the acts, policies, and practices under
22 investigation are actionable under the statute.

1 If the Trade Representative determines under the
2 statute that the acts, policies, and practices are
3 actionable, the Trade Representative will determine
4 if action is appropriate and, if so, what action
5 to take under Section 304 of the Trade Act. These
6 determinations on responsive action will involve
7 an additional opportunity for public comment.

8 We are pleased to be joined by
9 international trade and economic experts from a
10 range of U.S. Government departments and agencies
11 today. If you would all introduce yourselves,
12 beginning to my right.

13 MS. MASTMAN: Good morning. I'm Katy
14 Mastman. I'm the Assistant USTR for Labor Affairs.

15 MS. HUANG: Jessica Huang, International
16 Trade Administration of the Department of Commerce.

17 MS. YU: Good morning. Anne Yu with the
18 U.S. Department of Health and Human Services from
19 our Office of Health and Trade.

20 MR. HUFFMAN: Good morning. Stu Huffman,
21 U.S. Department of State, Office of Multilateral
22 Trade Affairs.

1 MR. HOXIE: Brian Hoxie, U.S. Customs and
2 Border Protection.

3 MS. BONNER: Sarah Bonner, U.S. Small
4 Business Administration, Office of Manufacturing
5 and Trade.

6 MS. RESNICK: Bonnie Resnick, Treasury
7 Department, Office of Trade and Investment Policy.

8 MR. RIGBY: Good morning. Crispin Rigby,
9 Department of Labor's Office of Trade and Labor
10 Affairs.

11 MR. STEPHENS: Andrew Stephens, U.S.
12 Department of Agriculture, Foreign Agricultural
13 Service.

14 MS. GRIMBALL: And I am Megan Grimball,
15 Senior Associate General Counsel from USTR and Chair
16 of the Section 301 Committee.

17 Before we proceed with the first panel of
18 the day, Panel 8, I will provide some procedural
19 and administrative instructions. These hearings
20 are scheduled for two days, concluding today,
21 Wednesday, April 29th. We expect these hearings
22 to conclude earlier in the afternoon.

1 Today, we will have four panels of
2 witnesses, with 19 individuals scheduled to
3 testify. The provisional schedule has been posted
4 to the USTR website. We will have a brief break
5 between panels and we'll plan to take a one-hour
6 lunch break from 12:50 to 1:50.

7 Please be aware that if you exit the
8 building for lunch, you will have to go through
9 security to return for the afternoon portion of the
10 hearings. In order to keep to the schedule, we
11 encourage witnesses on the panel following the lunch
12 break to return to the building 15 to 20 minutes
13 prior to the conclusion of the lunch hour to account
14 for the security line.

15 Each witness appearing at the hearing is
16 limited to five minutes of oral testimony. The
17 light before you will be green when you start your
18 testimony. Yellow means you have one minute left
19 and red means that your time has expired. A member
20 of our staff will remind you when your time has
21 expired and we ask that you promptly conclude your
22 testimony at that time.

1 After the testimony from each panel of
2 witnesses, the Section 301 Committee will have an
3 opportunity to ask questions. In some cases,
4 questions may be directed toward more than one
5 witness or to the entire panel. All questions will
6 be from the department/agency representatives.
7 There will be no questions accepted from the floor.

8 These hearings are being conducted in
9 English. Witnesses are welcome to use their own
10 translator if needed. Please advise a member of
11 our staff out front if you intend to use translation
12 services so that we can make appropriate
13 accommodations at the table.

14 Given the number of witnesses and the
15 schedule, we request that witnesses when responding
16 to questions be as concise as possible. We likewise
17 ask witnesses to be understanding if and when a
18 member of our staff asks that you conclude your
19 testimony or response. In this regard, witnesses
20 should recall that they will have a full opportunity
21 to provide more responses -- extensive comments,
22 rather, in their post-hearing submission.

1 No cameras or video or audio recording will
2 be allowed during these hearings. These
3 proceedings are not being live-streamed. If you
4 are observed recording these proceedings, you will
5 be asked to stop. Although recording is not
6 allowed, a written transcript of this hearing will
7 be posted on the USTR website as soon as possible
8 after the conclusion of the hearing.

9 The March 17th notice indicated that
10 post-hearing comments will be due seven days after
11 the last day of the public hearing. Because these
12 hearings are lasting two days, post-hearing
13 comments, including any written comments to
14 questions from the Government panel, are due May
15 6th, 2026. The rules and procedures for written
16 submissions are set out in the March 17th notice.

17 We will now proceed with the first panel
18 of the day, Panel 8.

19 Ambassador Sheikh, you have the floor.

20 AMBASSADOR SHEIKH: Thank you, Madam
21 Chairperson. I am Rizwan Saeed Sheikh, the
22 Ambassador of Pakistan to the United States, and

1 I am making this statement on behalf of my
2 government.

3 Madam Chairperson, members of the
4 Committee, excellencies, ladies and gentlemen, it
5 is my privilege to represent the Government of
6 Pakistan at this important public hearing being
7 conducted by the United States --

8 MR. BURCH: Ambassador, may you please
9 move your microphone closer to you?

10 AMBASSADOR SHEIKH: Is this better?

11 MR. BURCH: Yes.

12 AMBASSADOR SHEIKH: Okay. I'm making
13 this statement on behalf of the Government of
14 Pakistan. It is my privilege to represent the
15 Government at this important public hearing being
16 conducted by the U.S. Trade Representative, USTR,
17 and reaffirm commitment to protecting fundamental
18 labor rights, maintaining fair trade environment,
19 and economic relationship with the United States.

20 Let me share at the outset that the
21 bilateral trade between Pakistan and the United
22 States witnessed a robust growth in recent years.

1 The United States remains Pakistan's single
2 largest country export destination. Pakistan is
3 working constructively with the U.S. to finalize
4 bilateral trade agreements and it is at an advanced
5 stage of negotiation.

6 However, it is our considered position
7 that the initiation of investigation under Section
8 301 of the Trade Act is unwarranted, and there is
9 no evidence shared which could support that
10 Pakistani goods are either produced with forced
11 labor inputs and/or are integrated to its supply
12 chain or resulting in any burden, discrimination
13 against U.S. goods, or restricting U.S. commerce.

14 Pakistan has already established a robust
15 legislative and enforcement mechanism against
16 forced labor. The Constitution of Pakistan and
17 statutory frameworks at the federal and provincial
18 levels explicitly provide that forced labor,
19 trafficking in human beings, and slavery are
20 prohibited, and obligate the state to ensure the
21 elimination all forms of exploitation.

22 Pakistan ensures adherence to core

1 conventions of the International Labor
2 Organization, ILO, to prevent forced labor in all
3 its forms. The most significant recent development
4 is Pakistan's verification of the Protocol of 2014
5 to the Forced Labor Convention 1930. It was
6 accomplished in March 2025 and it requires states
7 to take effective measures to prevent forced labor
8 and strengthen due diligence and supply chain
9 obligations in all modern forms.

10 Further, and most significantly,
11 verifiable demonstration of Pakistan's commitment
12 to labor-related matters is its sustained
13 qualification under the EU GSP+, which ensures the
14 effective implementation of 27 core international
15 conventions, including those related to the
16 prevention of forced labor.

17 Pakistan is the world's fifth largest
18 cotton producer and the second larger importer of
19 U.S. cotton, which are primarily used in our major
20 exports of apparel and textile goods to the U.S.

21 Pakistan is also the third largest producer of
22 Better Cotton globally and making concerted

1 endeavors to drive a meaningful transition towards
2 regenerative, organic, and sustainable cotton
3 production to align with global regulations on
4 supply chain traceability, promoting responsible
5 farming practices, strengthening of farmer
6 livelihoods, and embedding environmental
7 stewardship.

8 Pakistan exports, mainly textiles and
9 apparel, drive their competitive advantage from the
10 vertically integrated supply chain and locally
11 procured inputs, which are preferred by
12 international brands and retailers due to a high
13 degree of transparency.

14 Traceability and socially compliant input
15 materials for the export of cost effective furnished
16 goods support U.S. brands, retailers, and
17 consumers. Our goods are competitively priced on
18 actual factor costs, with no reliance on
19 artificially suppressed labor inputs.

20 Additionally, Pakistan has made notable
21 progress through independent audits, third party
22 certifications, and multi-stakeholder initiatives,

1 such as Decent Work and Better Work country
2 programs, to ensure transparency in the supply
3 chains and prohibit forced labor.

4 Madam Chairperson and Committee members,
5 Pakistan has been exporting goods to the United
6 States without any finding against them on forced
7 labor grounds, which establishes that its
8 exporter-oriented sectors do not produce goods with
9 any forced labor inputs. While Pakistan maintains
10 strict enforcement of eliminating forced labor at
11 all levels, including the industrial manufacturing
12 level, the Government is also aligning its
13 trade-related regulations --

14 MS. GRIMBALL: Ambassador, your time has
15 expired.

16 MR. SHEIKH: I'm just half a minute short
17 of ending, if you will allow that.

18 MS. GRIMBALL: I'm sorry.

19 MR. SHEIKH: Okay, we'll have the written
20 submission made on record, the full statement.

21 MS. GRIMBALL: Absolutely.

22 MR. SHEIKH: Thank you, madam.

1 MS. GRIMBALL: Thank you.

2 Mr. Tariq, you have the floor.

3 MR. TARIQ: Madam Chairman and members of
4 the Section 301 Committee, good morning. My name
5 is Khurram Tariq. I'm the chairman of Kay & Emm's
6 (Private) Limited, Pakistani apparel manufacturer
7 that exports directly to the United States. I
8 appear before you today not merely as an individual
9 exporter, but as a representative voice of
10 Pakistan's broader apparel and textile industry
11 that employs millions of Pakistanis, sources and
12 processes American cotton, and has built a
13 three-decade compliance partnership with the
14 leading U.S. brands and retailers.

15 Pakistan is committed to constructive
16 engagement with the United States on this
17 investigation. Pakistan's public and private
18 sector is well-represented here, as we believe this
19 committee deserves a clear, evidence-based picture
20 of Pakistan's actual posture on forced labor, one
21 that is meaningfully different from the
22 characterization in the notice of initiation.

1 Pakistan's legal and policy framework, I
2 respectfully submit that the investigation notice
3 does not identify any specific act, policy, or
4 practice of Pakistan that permits forced labor in
5 the statutory sense.

6 Section 301 requires the persistent
7 pattern of conduct. Critically, Pakistan ratified
8 ILO Protocol of 2014 with forced labor number --
9 Protocol 29 in March 2025, which strengthens the
10 supply chain due diligence and precisely the kind
11 of progressive commitment required.

12 Pakistan has maintained EU GSP+ status
13 since 2014, with all 27 core international
14 conventions, including those on forced labor. This
15 is not self-certification. This is independently
16 verified by the European Commission. And, most
17 significantly, Pakistan is in the process to impose
18 a prohibition on the importation of goods with
19 forced labor in its import policy order.

20 This is precisely what Section 301,
21 Subsection A2, Subsection (b) identifies as
22 sufficient grounds for the Trade Representative not

1 to impose any punitive measures. Pakistan is not
2 absent from the process. It is actually engaged
3 in it.

4 The U.S. Customs and Border Protection's
5 own UFLPA enforcement data establishes that no
6 withhold release orders, WROs, are ever issued
7 against any Pakistani company and bulk commercial
8 shipments from Pakistan remain free of forced labor
9 imports.

10 USITC's own 2024 investigation into
11 apparel sector competitiveness, Investigation No.
12 332-602, found that Pakistan generally has a good
13 reputation among U.S. buyers for social and
14 environmental responsibility and that U.S. sourcing
15 representatives especially cited Pakistan
16 vertically integrated and domestically traceable
17 cotton supply chain as a compliance advantage in
18 the context of UFLPA.

19 Pakistan's apparel export factories
20 operate under different compliance structures,
21 naming RAP (phonetic), SA8000, BSCI, CDEX
22 (phonetic), GOTS, and Better Cotton Initiatives,

1 which are independently audited at the request of
2 U.S. brands we serve.

3 Tariffs from Pakistan would affect
4 bilateral trade. Pakistan is the second largest
5 importer of U.S. cotton in the world, approximately
6 \$4 billion purchased over the last five years. Our
7 factories take American fiber, process it in 35
8 compliant facilities, and deliver it to American
9 brands and retailers as finished goods that U.S.
10 consumers depend on. This is not a relationship
11 that competes with U.S. production. It complements
12 it.

13 Pakistan produces cotton bed linen,
14 towels, hosiery, and ready-made garments, product
15 categories not manufactured at commercial scale in
16 the United States. Cost of tariffs would affect
17 American retailers and brands and ultimately be
18 passed on to the American consumers. The U.S.
19 brands that source from Pakistan and who have
20 invested in our compliance infrastructure would be
21 at cost for a risk that the data does not justify.

22 We respectfully submit that no trade

1 restriction action is warranted against Pakistan
2 under this investigation, keeping into
3 consideration the actual Pakistan trajectory. We
4 urge USTR to and textile sectors as a model of supply
5 chain compliance and traceability that actively
6 adheres to global labor standards and supports the
7 U.S. commercial interests.

8 Further, the Government of Pakistan is
9 also in the process to enact formal labor import
10 prohibition, as well as to finalize a bilateral
11 trade agreement between the two countries. We
12 stand ready to provide any additional information
13 the Committee requires and to engage constructively
14 in any consultations that USTR wishes to convene.

15 Thank you.

16 MS. GRIMBALL: Thank you, Mr. Tariq.

17 Ms. El-Sabaawi, you have the floor.

18 MS. EL-SABAAWI: Good morning. I'm Laura
19 El-Sabaawi from Wiley Rein and I'm testifying today
20 on behalf of the Coalition of American Millwork
21 Producers. Thank you for the opportunity to
22 testify and for your hard work on these

1 investigations into the importation of goods
2 produced from forced labor. I will focus my
3 comments today on the use of forced labor in the
4 foreign production of wood moldings and millwork
5 products.

6 The Coalition is comprised of various
7 large and small wood moldings and millwork producers
8 from across the United States. These companies
9 include Brightwood Corporation, Cascade Wood
10 Products, Endura Products, Menzner Lumber & Supply
11 Co., Pacific Wood Laminates, Sierra Pacific
12 Industries, Sunset Moulding and Woodgrain Millwork.

13 They are part of a quintessential American
14 industry, manufacturing a variety of wood and
15 wood-derivative moldings and millwork products,
16 including door frames, window casings, crown
17 moldings, and baseboards.

18 This domestic industry is all too familiar
19 with U.S. trading partners who fail to play by the
20 rules. Over the years, the U.S. wood product sector
21 has suffered tremendous harm. including facility
22 closures, production curtailments, and job losses.

1 due to rising unfairly priced U.S. imports.
2 Conditions got so bad that in 2020 the Coalition
3 successfully filed trade cases targeting wood
4 moldings and mill products from China, which
5 resulted in the imposition of antidumping and
6 countervailing duties one year later.

7 While these duties have helped, the unfair
8 trade has, to some extent, shifted, with U.S.
9 imports of wood moldings and millwork products,
10 which are not subject to the current Section 232
11 tariffs on wood products, moving to other sources.

12 In recent years, the Coalition has seen
13 a surge in low-priced U.S. imports of wood moldings
14 and millwork products from countries like Brazil,
15 Vietnam, Cambodia, Malaysia, Indonesia, and Mexico.

16 These increased imports are a direct result of
17 rising excess capacity, which has been driven in
18 large part by trade-distortive measures in these
19 countries, including the failure to effectively
20 prohibit the import of goods produced using forced
21 labor.

22 The failure to effectively address forced

1 labor, in addition to the major ethical
2 implications, suppresses labor costs and provides
3 an unfair competitive advantage to foreign
4 producers. As the Coalition details in its
5 comments to USTR, a number of countries have failed
6 to adopt adequate trade protections against inputs
7 made with forced labor. The Chinese Government, for
8 example, represses internationally-recognized
9 labor rights, fails to adequately enforce existing
10 prohibitions on forced labor, and engages in state
11 sponsored forced labor.

12 The U.S. Government has expressed concerns
13 that neither Vietnam nor Brazil ban the importation
14 of goods produced from forced labor. For its part,
15 Mexico does not appear to be enforcing its forced
16 labor import prohibition. In fact, Customs
17 maintains at least two active withhold release
18 orders against Mexican companies for using forced
19 labor.

20 In closing, despite recent steps taken to
21 strengthen the forced labor laws in the United
22 States, many U.S. trading partners, including

1 China, Brazil, Vietnam, and Mexico, have failed to
2 adopt similar policies, allowing forced labor goods
3 to enter into their own countries and be funneled
4 into products later exported to the United States.

5 As a result, comprehensive 301 measures should be
6 imposed to address these unfair trade practices.

7 Thank you.

8 MS. GRIMBALL: Thank you, Ms. El-Sabaawi.

9 Ms. Amidon, you have the floor.

10 MS. AMIDON: Thank you, Chair, and members
11 of the Section 301 Committee. My name is Ashley
12 Amidon and I'm the CEO of the International Wood
13 Products Association, which is the leading trade
14 association for the North American international
15 wood products industry. We advocate for the growth
16 and acceptance of responsible, ethical, and
17 sustainable forest products sourced globally, while
18 supporting communities, trade, and consumers. We
19 greatly appreciate the opportunity to testify, as
20 this investigation has the potential to
21 dramatically reshape the United States' global
22 trading relationships.

1 Let me begin by saying the IWPA is
2 committed to legality, and, specifically, we oppose
3 the use of forced labor in the wood products supply
4 chain. We take our responsibility seriously to
5 ensure that wood products are produced in compliance
6 with a holistic legal framework, as our industry
7 knows that compliance with one law often reinforces
8 compliance with others, including the Lacey Act,
9 TSCA, FCPA, or UFLPA. Every instance of illegality
10 undermines the legitimate sustainable trade that
11 our members practice every day.

12 IWPA is fully committed to working with
13 government and industry partners to ensure that
14 criminal behavior, including forced labor, is
15 eliminated from global supply chains. We promote
16 legality through an extensive suite of educational
17 resources focused on the legal and regulatory
18 obligations under the numerous national and
19 international requirements governing wood
20 products. Our award-winning online and in-person
21 Lacey Act training was even made recently available
22 for free to all regulated industries through a USDA

1 APHIS grant.

2 We do this because American businesses
3 importing wood are legally required to conduct due
4 diligence into their supply chains. These
5 industry-led compliance efforts, such as extensive
6 on-the-ground audits, raise labor, environmental,
7 and regulatory standards throughout global supply
8 chains.

9 Access to the American market is itself
10 a powerful tool against the use of forced labor.

11 Decoupling from global markets only reduces
12 incentives for other countries to enforce or
13 implement anti-forced-labor provisions, and
14 tariffs would only add to the costs for American
15 businesses and consumers.

16 While IWPA strongly supports efforts to
17 combat forced labor, we do not believe broad, global
18 tariffs, particularly on already heavily regulated
19 industries, are an effective mechanism to do so.

20 Tariffs would punish industries that strive for
21 compliance and fail to meaningfully reduce instances
22 of forced labor. We urge USTR to prioritize

1 alternatives, such as dispute resolution processes
2 under existing international treaties and
3 international capacity-building initiatives.

4 If tariffs are ultimately imposed, we
5 asked that they be carefully structured, and I would
6 suggest the following recommendations. First,
7 exempt naturally unavailable species. Many
8 internationally-sourced wood species have no
9 domestic alternative and cannot be grown in the
10 United States. President Trump has wisely exempted
11 such products under Section 122 and previously under
12 the IEEPA tariff regime. This committee should do
13 the same.

14 Many species of international wood are
15 chosen for specific performance characteristics
16 which are not found in any North American species.

17 An example is certain tone woods used in musical
18 instrument manufacturing. Cutting off access to
19 these inputs would significantly harm American
20 manufacturing and artistic competitiveness.

21 Second, prevent duty stacking. Goods
22 already subject to other duties, such as Section

1 232 measures, should be excluded from any new
2 action. A de-stacking mechanism is essential to
3 ensure cumulative duties do not exceed what is
4 needed to achieve the policy's intended goals.

5 Third, phase in duties gradually. As USTR
6 has recommended in prior cases, including the
7 Chinese shipbuilding investigation, a phase-in
8 period allows businesses to incorporate new costs
9 into long-term purchasing and operational
10 decisions. If a phase-in is not feasible, an
11 in-transit exception for goods already en route
12 should be established.

13 Fourth, exclude USMCA-eligible goods.
14 Allegations of deficient labor practices involving
15 USMCA partners should be pursued through the
16 treaty's established dispute resolution process.

17 Fifth, establish country-specific
18 benchmarks and an off-ramp. This committee should
19 set clear, country-by-country standards for
20 improving labor practices, along with a transparent
21 process for reducing duties on countries that
22 demonstrate meaningful progress. This creates

1 strong positive incentives for compliance with U.S.
2 labors standards.

3 Finally, we urge the Committee to ensure
4 a full comment period prior to implementing any
5 proposed action. This second comment period will
6 allow stakeholders to assist USTR by identifying
7 additional ways to more effectively target forced
8 labor while protecting the broader American
9 economy. IWPA believes that it is essential for
10 industry and government to partner together to
11 advance the American economy and to ensure that good
12 policies, such as continuing to exclude products
13 of forced labor from our shelves, are realized.

14 Thank you for your time and I look forward
15 to answering any questions you may have.

16 MS. GRIMBALL: Thank you, Ms. Amidon.

17 Mr. Keeling, you have the floor.

18 MR. KEELING: Thank you. Good morning.

19 My name is Darrell Keeling. I'm Chief Operating
20 Officer with AHF, LLC. We're a hard surface
21 flooring producer and provider to the industry.
22 We operate 11 facilities domestically and one in

1 Cambodia. And I thank you for the opportunity to
2 testify this morning.

3 Forced labor is insidious and abhorrent.

4 And, as USTR recognizes in this investigation, it's
5 a crime that has no borders. Unless and until
6 countries and, critically, companies step up to
7 police them. AHF, LLC is an American company and
8 a manufacturer that is committed to high standards.

9 Our workers should not have to compete against
10 products made with forced labor. Through smart
11 action in this investigation, USTR can leverage the
12 resources of companies like AHF to advance the
13 global fight against forced labor and make a real
14 difference in the lives of people around the world.

15 In particular, USTR should focus efforts
16 on those that do not take measures to ensure their
17 supply chains comply with all applicable laws and
18 industry standards. Forced labor thrives where
19 unscrupulous actors can economically benefit from
20 it. The goal must be to deprive these actors of
21 their competitive benefit.

22 An approach that penalizes equally

1 businesses that have high standards and those that
2 may use forced labor does not change the economics.

3 For example, if you apply a flat tariff to all
4 products from a particular country, every company
5 may be absolutely disadvantaged, but the
6 comparative benefits secured by those who exploit
7 forced labor still remain. Indeed, exploiting
8 forced labor may become even more lucrative if the
9 legitimate business who spends more to keep their
10 supply chains clean are struggling.

11 AHF proposes USTR adopt a granular
12 analysis in this investigation to determine what
13 particular companies are doing to make sure their
14 supply chains are clean. For AHF, we have one
15 overseas facility in Cambodia that makes the type
16 of engineered wood flooring that we cannot
17 economically produce in the United States. AHF has
18 ensured through various actions that the high labor
19 standards that we apply here in the U.S. apply to
20 our Cambodian facility, too. We also have
21 implemented U.S. OSHA safety standards in that
22 facility.

1 These actions include: having an
2 experienced managing director at our facility
3 onsite -- he's an American and a decorated U.S. Army
4 veteran who served in Iraq; establishing policies
5 and enforcing them, including by conducting
6 internal trainings; requiring contractual
7 obligations from our suppliers to follow the laws
8 and standards in conducting audits to make sure that
9 that is, in fact, the case; and we use a third-party
10 company, Zimmfor Management Services, to make sure
11 our supply chain is clean and compliant. These
12 efforts ensure that AHF is not complicit, directly
13 or indirectly, with those that use forced labor.

14 There are numerous other actors who do not,
15 because they cannot, make these types of robust
16 efforts to monitor their overseas production and
17 supply chain. Unfortunately, many of them operate
18 in sectors where forced labor is particularly a
19 problem. USTR should treat these actors
20 differently than those that are doing the right
21 thing, like AHF. To do this, AHF encourages USTR
22 to consider three approaches.

1 First, focus on taking action that reduces
2 the comparative advantage of companies that use
3 forced labor by ensuring companies that do the right
4 thing are not penalized. This is not without
5 precedent. The United States applies antidumping
6 and countervailing duties on a company-specific
7 basis if a company can show that it works hard to
8 keep its supply chains clean. It should be treated
9 better. If a company can't, well, then it should
10 pay the cost of what effectively is a subsidy. A
11 failure to ensure labor laws will follow.

12 Second, USTR should focus on actions on
13 sectors that present greater risk of forced labor.

14 As U.S. Customs and Border Protection's work with
15 respective withhold release orders demonstrates,
16 forced labor is prevalent in low value chain
17 products that do not require sophisticated training
18 of workers. In AHF's experience, flooring is not
19 one of these sectors. Workers who manufacture
20 flooring need technical skills, trainings to
21 operate advanced machinery, maintain quality
22 control, and handle materials with precision. We

1 know because we train our workers well and our
2 turnover is low in our factory in Cambodia.

3 Third, USTR should provide better
4 treatments to countries such as Cambodia that have
5 entered into agreements on reciprocal trade, ART
6 agreements that have strong forced labor
7 provisions. Those countries that have
8 demonstrated they're ready to work with the
9 administration. Providing them better treatment
10 will incentivize the other countries into such
11 agreements with the United States as well.

12 In conclusion, AHF appreciates the work
13 USTR is doing as well as the opportunity to testify
14 here today. We respectfully demand action against
15 those who fail to act and support those that do the
16 right thing. Thank you.

17 MS. GRIMBALL: Thank you, Mr. Keeling.

18 We'll now proceed with questions from the
19 Government panel.

20 MR. STEPHENS: I have a question for Mr.
21 Sheikh, Ambassador Sheikh.

22 Your written comments indicate that

1 Pakistan has initiated the process to impose
2 prohibitions on imports of goods manufactured by
3 forced labor under the import policy order. Does
4 the Government of Pakistan currently have the
5 legally authority to investigate use of forced labor
6 in the production of imports and to bar the entry
7 of those goods into Pakistan markets? And what
8 actions has Pakistan taken, if any, to investigate
9 and prohibit the entry of imported goods made with
10 forced labor?

11 AMBASSADOR SHEIKH: Thank you for the
12 question. Let me highlight that, as has been
13 mentioned in the statement, Pakistan is not only
14 signatory to the ILO framework, which prohibits
15 forced labor, but, as I mentioned, we recently, in
16 2025, basically signed the Protocol of 1930, Forced
17 Labor Convention 1930, we find the Protocol of 2014
18 attached to it, which requires states to take
19 effective measures to prevent forced labor and
20 strengthen due diligence in supply chain
21 obligations in all its modern forms.

22 And there is even a recent legislation,

1 a recent SRO that has been issued, and a copy of
2 that can be provided, with a view to enforcing this
3 mechanism and initiating any inquiries or demands
4 with regard to any observance of practice which is
5 not in consonance with these conventions and with
6 the Constitution of Pakistan that prohibits such
7 practices. But Pakistan is in a position to
8 initiate that process, but exact specific language
9 that is there can be afforded in post-hearing
10 submissions.

11 MR. STEPHENS: That would be great.
12 Thank you very much.

13 MS. HUANG: Good morning. My question is
14 for Khurram Tariq. Apologies if I mispronounced
15 your name.

16 In PRGMEA's written comments, the written
17 comment lists industry certifications and standards
18 that are described as driven by prior protocols.

19 The comment also states, in quotations, all of our
20 member companies and exporters of apparel follow
21 government-set import policy order which clearly
22 prohibits importation of materials which are made

1 by forced labor known companies."

2 Can you please identify and describe the
3 import policy order in the public comments?

4 MR. TARIQ: Well, the import policy order
5 was just mentioned by the Honorable Ambassador.

6 The import policy order amendment has recently been
7 issued, which the Ambassador just mentioned, and
8 a copy will be provided to you.

9 However, I would like to mention that our
10 compliance is not aspirational. It's actually
11 operating baseline, so when American buyers, they
12 enforce through when they write their purchase
13 orders. So they enforce through nominated
14 sourcing. So they already do the due diligence if
15 something needs to come from a third country, which
16 in Pakistan's case is very limited because most of
17 the imports are domestic. So that is all well set
18 in stone. And the copy will be provided.

19 MS. HUANG: Thank you.

20 MR. TARIQ: Thank you.

21 MR. STEPHENS: For Laura El-Sabaawi, in
22 your written comments, you discuss the use of forced

1 labor in wood moldings and millwork products. How
2 has the competition with goods produced with forced
3 labor impacted U.S. millwork producers in third
4 country export markets? And please provide
5 country-specific export market examples.

6 MS. EL-SABAAWI: I can provide more
7 specifics, I think, in a post-hearing submission,
8 but the primary impacts would be on their costs.

9 Labor is a rather significant portion of the cost
10 of wood molding and millwork production. And, of
11 course, if you're not paying decent wages and
12 abiding by forced labor prohibitions, either
13 yourself or if those producers are importing inputs
14 into their countries that were produced with the
15 use of forced labor, then they are paying lower costs
16 for those inputs.

17 So, those cost advantages have a big
18 impact, and we see that when those goods are later
19 shipped to the United States. They're being sold
20 at very low prices and it makes it really difficult
21 for U.S. wood moldings and millwork producers to
22 compete with that when we are paying appropriate

1 wages, paying appropriate costs for our inputs.
2 It just really distorts the playing field.

3 MR. STEPHENS: Thank you.

4 MS. RESNICK: This question is for Ms.
5 Amidon. Your submission recommends establishing
6 clear, country-specific benchmarks regarding
7 forced labor that must be met before duties are
8 reduced. What should those benchmarks look like
9 in practice and how can they be designed to ensure
10 meaningful progress on forced labor?

11 MS. AMIDON: Thank you so much for the
12 question. And I'm happy to provide, of course, more
13 detail in a post-hearing submission. But I would
14 way that would best be determined in bilateral
15 discussions between those nations. Every nation,
16 as I think has been remarked upon, is going to be
17 a different case, and so to apply a uniform,
18 one-size-fits-all would probably not be the best
19 path forward, whether that's, quite frankly, for
20 tariffs or for benchmarks.

21 We would support that discussion to be had
22 individually. And we feel there's actually been

1 a couple good examples that have happened in the
2 past when it comes to ways that countries have worked
3 together. The Peru Trade Promotion Agreement has
4 an environmental chapter, specifically a forest
5 sector annex, and it requires Peru to perform
6 audits, verification. There's a role that the
7 United States plays in that, both in terms of being
8 able to request specific verification of companies,
9 as well as to prohibit trade. So we feel that
10 something like that could be a very good roadmap.

11 But, again, we would recommend that that's a
12 bilateral discussion, country by country.

13 MS. YU: The next question is for Darrell
14 Keeling. In your submission, you mention that
15 Cambodia has acted against forced labor within the
16 country. Can you provide examples, especially
17 examples in the manufacturing sector, where you have
18 seen Cambodia act against forced labor?

19 MR. KEELING: Thank you for the question.
20 I'm going to gather my thoughts here. In the
21 manufacturing sector itself, I do not personally
22 have an example of that. I know in other sectors

1 that are active in Cambodia, where they have really
2 gone after the illegal gambling and things like
3 that, they have made a very big dent in that and
4 a lot of progress along those lines.

5 The manufacturing area where we operate
6 tends to rely on employees that need to be there
7 for long periods of time to gain the skills and be
8 able to execute the plan well. And so you typically
9 don't end up with the forced labor issue in the areas
10 that we're operating in.

11 MS. YU: Thank you.

12 MS. GRIMBALL: Thank you to all the
13 witnesses on Panel 8 for your testimony. Before
14 I release this panel, I just wanted to make one
15 additional announcement. This morning I
16 referenced the schedule that had been posted on
17 USTR's website. That schedule does have five
18 panels scheduled for today. We are actually going
19 to have just four panels together. There will only
20 be one panel after lunch. You may have noticed that
21 two of the witnesses from the last panel of the day
22 are actually on this panel, and we moved another

1 witness around, so we're only going to have four
2 panels this morning.

3 We will take a five-minute break between
4 this panel. And let's have Panel 9 join us at 10:50.
5 Thank you.

6 (Whereupon, the above-entitled matter
7 went off the record at 10:43 a.m. and resumed at
8 10:50 a.m.)

9 MR. BURCH: Would the room please come to
10 order?

11 MS. YANAGAWA: Good morning. We have a
12 number of new panelists on the panel, so if I could
13 have the government representatives please start
14 with their introductions for people on my right?

15 MS. MASTMAN: Sure, hi. I'm Katy
16 Mastman. I'm the Assistant USTR for Labor Affairs.

17 MS. HUANG: Jessica Huang of the
18 International Trade Administration of the U.S.
19 Department of Commerce.

20 MS. YU: Anne Yu with the U.S. Department
21 of Health and Human Services in our Office of Trade
22 and Health.

1 MR. HUFFMAN: Stu Huffman, U.S.
2 Department of State, Office of Multilateral Trade
3 Affairs.

4 MS. ECHEVERRIA: Cynthia Echeverria with
5 the Department of Homeland Security.

6 MS. CHERNOV: Betsy Chernov, Director of
7 Office of International Affairs and Trade Policy
8 with the Office of Manufacturing and Trade, Small
9 Business Administration.

10 MS. RESNICK: Bonnie Resnick, Department
11 of Treasury, Office of Trade and Investment Policy.

12 MR. RIGBY: Crispin Rigby, Department of
13 Labor, Office of Trade and Labor Affairs.

14 MS. YANAGAWA: And I'm Grace Yanagawa,
15 Assistant General Counsel with USTR.

16 We will now proceed with Panel 9.

17 Mr. Waldron, you have the floor.

18 MR. WALDRON: Good morning, and
19 appreciation to the panel for having us and hearing
20 our testimony this morning. My name is Michael
21 Waldron. I'm Senior Vice President of Corporate
22 Affairs and Sustainability for Vantage Specialty

1 Chemicals. On behalf of our entire industry, we
2 appreciate the USTR's initiation of this Section
3 301 investigation.

4 Vantage and our affiliates are one of the
5 largest producers of oleochemicals in the United
6 States. These products are largely made from
7 natural fats like beef tallow, oils, soy, canola,
8 and are -- that are produced by American farmers
9 and ranchers. The oleochemicals are found in
10 products across the U.S. economy, including
11 pharmaceuticals, personal care and beauty products,
12 human and animal nutrition products, and a wide
13 range of products in industrial and transportation
14 applications.

15 Vantage alone employs nearly 600 workers
16 across our manufacturing footprint in Illinois,
17 Pennsylvania, and Ohio. And our industry, as a
18 whole, supports thousands of direct manufacturing
19 jobs throughout the country and countless more
20 indirect jobs.

21 In recent years, the domestic oleochemical
22 industry has experienced material harm from cheap

1 imports dumped into the U.S. at artificially low
2 prices. One of the ways foreign producers achieve
3 these prices is through their labor practices. In
4 fact, several of the countries under examination
5 have been found to use forced labor and child labor
6 in the production of oleochemicals that are exported
7 to the United States.

8 The most significant sources of these
9 imported products are Indonesia and Malaysia. As
10 you know, the Department of Labor, U.S. Customs and
11 Border Protection, the International Labor
12 Organization, and numerous NGO studies have found
13 widespread use of forced labor and child labor
14 practices. At the same time, these countries
15 ignore international norms and fail to enforce their
16 own laws outlawing these practices.

17 Indonesia and Malaysia's persistent
18 failure to effectively prevent forced labor and
19 child labor is not only legally and morally
20 reprehensible, it also negatively impacts American
21 workers, our industry, and the communities we
22 operate in.

1 The impact of these practices on the U.S.
2 industry and its workers is evident. As an
3 industry, we've experienced declining capacity
4 utilization, hundreds of layoffs, and multiple
5 plant closures. In the past two years alone, two
6 U.S.-based oleochemical producers have been forced
7 to cease production.

8 While Vantage and others in the U.S.
9 industry, including organized labor, are actively
10 using our AD/CVD laws to combat this unfair trade,
11 such laws alone are not sufficient to address the
12 devastating impact of these practices.
13 Antidumping and countervailing duty measures do not
14 directly address the role of forced labor in the
15 Indonesian and Malaysian oleochemical industries,
16 and they do not prevent the goods produced under
17 these conditions from entering the U.S. market.

18 This, therefore, is not simply a pricing
19 issue; it's a trade distortion tied to our trading
20 partners' continued use of unjustifiable methods
21 of production that rely on forced labor.
22 Accordingly, we urge the USTR to take appropriate

1 action as part of these investigations.

2 The response under Section 301 must be
3 commensurate with the scale and persistence of this
4 distortion. It should include tariffs and other
5 effective trade measures to address the ongoing harm
6 caused by unfair oleochemical imports. More
7 limited measures like the AD/CVD option will not
8 be enough to address this problem at scale.

9 Any response should also account for the
10 circumvention risk included in attempts to continue
11 to ship oleochemicals that are the product of forced
12 labor or child labor through downstream products
13 and third country production.

14 In closing, oleochemical products are
15 foundational inputs across the U.S. economy. They
16 support thousands of jobs across the sector,
17 including agriculture and downstream industries.

18 Indonesia and Malaysia's use and tolerance
19 of child labor and forced labor in their own
20 oleochemical industries is well documented by the
21 U.S. government, international organizations, and
22 others whose integrity is beyond question.

1 These countries' oleochemical exports are
2 actively harming U.S. oleochemical industries,
3 company members, its workers, communities, and have
4 led to layoffs, closures, and continued presence
5 of these products in the United States. Without
6 effective action, this harm will continue.

7 For these reasons, we respectfully urge
8 USTR to take strong and effective action to stop
9 imports of oleochemicals produced with forced labor
10 and child labor, and force our trading partners to
11 stop these abhorrent practices once and for all.

12 Thank you very much.

13 MS. YANAGAWA: Thank you for your
14 testimony.

15 Mr. Batson, the floor is yours.

16 MR. BATSON: Good morning, members of the
17 301 Committee. I'm Russ Batson, I'm the Executive
18 Director of the Polyurethane Foam Association. PFA
19 is the trade group representing manufacturers of
20 flexible polyurethane foam as well as the companies
21 that supply them with chemicals and machinery
22 equipment. Some of our members also make

1 mattresses and upholstered furniture.

2 PFA supports the Administration's
3 objective of strengthening domestic manufacturing
4 and we agree that artificially low-cost inputs
5 produced with forced labor unfairly disadvantage
6 U.S. manufacturers and workers.

7 My remarks today focus on an unfortunate
8 supply chain crisis facing our industry and we
9 recommend that, should USTR determine that this
10 investigation is actionable, that HTS Code 3907.29
11 covering polyether polyols be excluded from the
12 scope of any additional duties imposed pursuant to
13 Section 301.

14 In 2026, supplies of polyols -- I'll
15 explain a little of what that classic chemicals is
16 -- supplies of polyols in North America are greatly
17 constrained due to the Middle East situation as well
18 as a force majeure event declared by LyondellBasell
19 at its Bayport, Texas facility. This plant
20 produces propylene oxide, which is indispensable
21 to producing polyol, which in turn is indispensable
22 to producing polyurethane foam. This force majeure

1 comes on top of the permanent closure of a Dow
2 facility in Freeport, Texas. And the net effect
3 of those closures has removed a substantial portion
4 of the domestic PO capacity from the market.

5 Shortages of polyols predictably
6 undermine the production of polyurethane foam and
7 the broad range of consumer and industrial products
8 that depend upon it. We learned this in 2021 during
9 the supply chain disruption set in motion by Winter
10 Storm Uri, which shut down key chemical facilities
11 along the U.S. Gulf Coast.

12 That year, foam deliveries by some foam
13 manufacturers were curtailed by 50 percent, and
14 retailers of furniture and mattresses, two of the
15 key foam in markets, reported higher prices for
16 those products and months-long delays filling
17 consumer orders.

18 The downstream economic value at risk in
19 such situations is orders of magnitude greater than
20 the value of the chemicals involved. And that's
21 because of the foam's central role in consumer
22 products that we touched upon, mattresses,

1 upholstered furniture, carpet underlay, packaging,
2 medical devices, and automotive interiors.

3 Facilities producing these goods employ
4 tens of thousands of American workers. Additional
5 duties on polyols would threatened production
6 continuity, raise costs, and result in higher prices
7 and reduced product availability for U.S.
8 consumers. PFA recognizes that this situation is
9 not the direct result of policy choices.

10 Nonetheless, in evaluating the
11 appropriate scope of any Section 301 remedies, USTR
12 should avoid measures that would worsen existing
13 shortages and compound downstream economic harm.

14 For these reasons, PFA respectfully requests that
15 the Administration exclude HTS Code 3907.29 from
16 the scope of any duties imposed via Section 301 in
17 this investigation.

18 Thank you.

19 MS. YANAGAWA: Thank you for your
20 testimony.

21 Mr. Wolf, please proceed.

22 MR. WOLF: Thank you. My name is Wade

1 Wolf. I'm the Senior Director for Trade Compliance
2 for the Chemours Company, and thank you for the
3 opportunity to testify today.

4 The Chemours Company strongly supports
5 USTR's use of Section 301 to confront forced labor,
6 non-market practices, and supply chain
7 vulnerabilities, and views this investigation as
8 a key opportunity to reinforce American
9 manufacturing leadership.

10 Chemours is a U.S.-headquartered
11 manufacturer that has deliberately maintained the
12 majority of its production and R&D in the United
13 States while our competitors have offshored. Today,
14 Chemours stands as the last domestic U.S. producer
15 of several critical chemical materials that
16 underpin strategic industries, including
17 semiconductors, aerospace, energy, and advanced
18 manufacturing.

19 Chemours also maintains rigorous and
20 forceful prohibitions on forced labor across its
21 operations and supply chain, embedding these
22 standards in our contracts, our compliance systems,

1 and requiring all partners to meet the high labor
2 and sourcing standards consistent with the U.S.
3 policy objectives.

4 Chemours supports the Administration's
5 focus on reshoring production, securing supply
6 chains, and countering China's nonmarket behavior.

7 To advance those priorities, Section 301 tariffs
8 should be targeted at finished goods manufactured
9 outside the United States and imported into our
10 country. These imported finished goods are the
11 crux of the forced labor risks in the U.S. supply
12 chain that harm American manufacturers like
13 Chemours.

14 In the specialty chemical sector, foreign
15 producers of finished goods from China and other
16 jurisdictions benefit from lower forced labor
17 standards and state-backed overcapacity and pricing
18 distortions, enabling exports at artificially low
19 prices that undercut U.S. producers. This, in
20 turn, suppresses returns on domestic investment and
21 deters the expansion of U.S.-based capacity in
22 sectors critical to industrial and supply chain

1 resilience.

2 Given this reality, the Section 301
3 tariffs on finished goods can be an effective policy
4 intervention in the chemical sector. However,
5 having said that, we'd like to make sure that we
6 avoid unintended consequences on chemical inputs
7 that will frustrate the Administration's trade
8 policy priorities.

9 Chemours and other U.S. manufacturers rely
10 on imported raw materials and intermediates that
11 are essential to domestic production and often not
12 available at the scale, quality, consistency, and
13 needed in the U.S. These inputs are critical to
14 producing high value goods across the sectors like
15 semiconductors, advanced manufacturing, and energy
16 systems.

17 If the goal is to support U.S.
18 manufacturers and strengthen domestic production,
19 imported raw materials and other manufacturing
20 input should remain free of the Section 301 tariffs.
21 Tariffs on these goods function as a direct tax
22 on U.S. manufacturing, raising the input costs,

1 reducing global competitiveness, and discouraging
2 the investment in U.S. based production.

3 The targeted approach that I've described,
4 tariffing finished goods while avoiding tariffs on
5 manufacturing inputs that the U.S. chemical
6 producers require, best aligns with the
7 administration's economic and national security
8 objectives. By strengthening the domestic
9 production through smart, targeted tariff policy,
10 the administration will support American workers
11 and ensure that the U.S. chemical manufacturers can
12 compete and win globally.

13 Thank you for your time.

14 MS. YANAGAWA: Thank you for your
15 testimony.

16 Mr. Feagley?

17 MR. FEAGLEY: Thank you very much. My name
18 is Duane Feagley, and I am Executive Director of
19 the Pennsylvania Anthracite Council. I represent
20 the only domestic source of anthracite coal, which
21 is commonly known as hard coal, in the United States,
22 a material that is essential to electric arc

1 furnace, steel production, and, by extension, our
2 national defense industrial base.

3 I have submitted written comments for the
4 record on April 15th outlining serious concerns
5 regarding labor enforcement, traceability, market
6 impacts associated with anthracite imports from
7 Peru. Today, I want to focus in on just one central
8 issue: the pricing that we are seeing in this market
9 cannot be explained by normal competition.

10 U.S. anthracite production is driven by
11 four primary factors: energy, equipment, labor
12 bonding, and environmental reclamation. Based on
13 available information, there is no evidence that
14 energy or equipment costs in Peru are materially
15 lower than the United States at a level sufficient
16 to -- that can explain current pricing. However,
17 the data clearly shows that Peruvian anthracite is
18 being offered at approximately \$90 to \$100 per short
19 ton at the port, a level that is below the cost of
20 production for U.S. operators.

21 That leaves only two remaining cost
22 drivers capable of explaining that gap: labor costs

1 and practices and environmental and reclamation
2 obligations.

3 On labor, the U.S. Department of Labor has
4 identified ongoing concerns regarding forced labor
5 in Peru's mining sector, including documented risks
6 associated with informal and unregulated mining
7 operations. These concerns align broadly with
8 broader reporting across Peru's extractive
9 industries, particularly in industry sectors such
10 as gold mining, where monitoring supply chains is
11 difficult and enforcement has proven challenging.

12 While gold has received greater
13 international attention, these conditions reflect
14 structural issues across the mining sector as a
15 whole, especially in regions where mining
16 activities conducted outside formal regulatory,
17 labor, and reporting frameworks are prevalent and
18 oversight is limited.

19 In that context, the absence of a reliable
20 mechanism for independent verification means that
21 U.S. buyers cannot confidently determine whether
22 imported anthracite or any similarly situated

1 mineral is produced in compliance with
2 internationally recognized labor standards.

3 Our environmental obligations, the United
4 States producers operate under strict federal and
5 state requirements, including bonding,
6 reclamation, and long-term land restoration.
7 These are real costs that must be paid as a condition
8 of lawful operation. Imported material does not
9 carry comparable obligations.

10 So, when we see a product entering the
11 United States market at a price below the cost of
12 lawful domestic production, the conclusion is
13 straightforward. This is not a function of
14 efficiency; it's a result of costs that are not being
15 paid.

16 This cost distortion is already having
17 measurable impacts. In 2025, imports of Peruvian
18 anthracite increased by more than 360 percent,
19 reaching approximately 184,000 short tons and
20 capturing roughly 17 percent of the U.S. electric
21 arc furnace carbon market. During this same
22 period, Pennsylvania anthracite employment decline

1 with both direct jobs and a broader affiliated
2 employment showing measurable reductions.

3 But this is not just an economic issue.

4 Anthracite is a critical carbon input in electric
5 arc furnace steelmaking. While alternative carbon
6 sources such as coke breeze and petroleum coke do
7 exist, they are not fully interchangeable without
8 operational quality and cost trade-offs. These
9 alternatives affect furnace efficiency, emissions,
10 and steel quality and increased costs for reduced
11 performance.

12 If domestic production is displaced by
13 imports produced by under non-transparent or
14 non-compliant conditions, the United States becomes
15 dependent on a foreign supply chain for its critical
16 industrial base. This introduces multiple risks
17 to supply chain disruptions, regulatory risk if
18 labor violations trigger enforcement actions, and
19 strategic vulnerability in a sector tied directly
20 to national defense.

21 Our domestic mining -- once our domestic
22 mining capacity is idled, it cannot quickly be

1 restarted. The loss of this warm base capacity is
2 not theoretical; it is permanent, in many cases.

3 The record clearly shows demonstrated
4 documented labor enforcement concerns, lack of
5 traceability and verification, significant and
6 sustained price undercutting, and measurable
7 displacement of domestic production. Taken
8 together, these conditions do meet the standard for
9 action under Section 301.

10 Based on this record, we respectfully
11 recommend that the U.S. Trade Representative
12 consider targeted duties sufficient to offset cost
13 distortions and enhance verification requirements
14 for labor and origin compliance and appropriate
15 enforcement measures to ensure fair competition.

16 When a product is sold below the cost of
17 a lawful production in the United States, the
18 question is not efficiency, the question is: what
19 costs are not being paid?

20 Thank you for your time and we look forward
21 to your questions.

22 MS. YANAGAWA: Thank you. We will now

1 proceed to questions from the Government panel.

2 MS. HUANG: Hello. My question is for
3 Michael Waldron of Vantage Specialty Chemicals.

4 Regarding forced labor in Indonesia and
5 Malaysia's oleochemical industry, does Vantage's
6 concern focus only on factors producing
7 oleochemicals and derivative products or does it
8 also include coconut and palm oil farms that are
9 supplying the feed stocks?

10 MR. WALDRON: Yes, thank you for the
11 question. I would say our concern is very broad.

12 One of the reasons for the price distortion and
13 the low prices that the importers can charge in the
14 United States is as a result of labor inputs, and
15 that is related to feed stock upstream.

16 MS. HUANG: Thank you.

17 MS. ECHEVERRIA: Good morning, and thank
18 you for your testimony. This question is for Mr.
19 Batson and Mr. Wolf.

20 How has competition with producers using
21 forced labor affected your companies? And what
22 actions can the U.S. chemical industry take to

1 accelerate reshoring of domestic key fluorochemical
2 manufacturing and reduce reliance on imports from
3 nations that do not effectively produce -- I'm sorry
4 -- effectively prohibit use of forced labor in their
5 supply chains?

6 MR. BATSON: I'll start. In applying to
7 testify, we indicated a lack of expertise on forced
8 labor. I was kind of surprised to be chosen for
9 a panel, and our remarks are really confined to that
10 critical shortage of propylene oxide that's
11 impacting our industry.

12 I will confer with my members, though, and
13 if there are some insights that we can share in the
14 post-hearing comments, we'll do so.

15 MS. ECHEVERRIA: Thank you.

16 MR. WOLF: Thank you. I guess there's a
17 couple ways to address this -- and we will also have
18 full comments after this. But when I look at what
19 it does to competition, when you when you have a
20 compliance program, it costs money. You know, an
21 ethical decision is free. But to design a program
22 that tracks forced labor, enforces it, gives our

1 operating structure the right -- and in our
2 leadership, the right confidence that we're doing
3 the right things all over the world, that costs money
4 to maintain.

5 And when companies don't monitor forced
6 labor and don't enforce it, they often weigh the
7 cost of noncompliance versus how low of a cost can
8 I get into a market. And there's just -- there's
9 not a good barrier of enforcement there. And so
10 I think, you know, one of the ways to combat that
11 is through a tariff regime where the cost of
12 enforcement is higher than the cost of
13 non-enforcement.

14 And the direct question to, what would it
15 take to reshore the chemical industry? It's a hard
16 question that we've asked ourselves for years. And
17 this goes back into it takes, you know, five to ten
18 years from idea to implementation of a chemical
19 plant. And there's some raw materials that just
20 are not economically viable in the United States.

21 And so, I don't know that there's a world where
22 everything can be done here, but there's a way that

1 we can do it effectively from a forced labor
2 perspective.

3 MS. ECHEVERRIA: Thank you.

4 MS. YU: The next question is for Duane
5 Feagley. In your testimony, you stated. under the
6 Labor enforcement deficiency section. that, quote,
7 these weaknesses are not commodity-specific and
8 extend across the extractive sector, including
9 Peru's anthracite industry. As a result, it is our
10 firm belief that similar risks exist within Peru's
11 anthracite supply chain.

12 Can you clarify, are you stating that child
13 labor or forced labor issues extend into Peru's
14 anthracite industry and Peru's anthracite supply
15 chain? If so, are you able to provide specific
16 evidence or examples of forced labor improves
17 anthracite production?

18 MR. FEAGLEY: Good question. Thank you
19 very much for the question. I'm not making any
20 specific claims in that about special operators or
21 shipments coming in or specific operations that are
22 coming in. I'm simply pointing to the U.S.

1 Department of Labor findings identifying risks in
2 the mining sector overall in Peru.

3 The key issue here is that, currently,
4 there's no reliable mechanism for independent
5 verification on which U.S. buyers can bring the
6 stuff into the country with -- and determine its
7 compliance.

8 And as I mentioned also earlier, when you
9 look at the cost factors, at \$95 to \$100 a ton, it's
10 coming in at less than what we can mine it for here
11 in the United States.

12 So, there's got to be a reason for that,
13 and if it's not going to be your fuel costs, and
14 if it's not going to be your equipment costs, then
15 it's got to be the labor costs and it's got to be
16 the environmental reclamation costs that's making
17 up the difference. That's sheer logic.

18 Again, I have no documentation at this time
19 to point on that, but logic dictates that that's
20 the issue.

21 MS. YU: Thank you.

22 MS. YANAGAWA: Thank you for

1 participating in today's hearing. This panel is
2 released.

3 We will now take a five-minute break to
4 set up for the next panel and we'll resume at 11:20.

5 (Whereupon, the above-entitled matter
6 went off the record at 11:14 a.m. and resumed at
7 11:22 a.m.)

8 MS. YANAGAWA: Good morning. We will now
9 proceed with Panel 10.

10 Mr. Fernandez, the floor is yours.

11 MR. ACEVEDO FERNANDEZ: Thank you.

12 Distinguished members of the Section 301 Committee,
13 on behalf of the Government of Mexico, we appreciate
14 the opportunity to appear before you today.

15 Mexico rejects any suggestion that its
16 acts, policies, or practices are unreasonable,
17 discriminatory, or burdensome to U.S. commerce.
18 Mexico reiterates that there is no legal or factual
19 basis for including Mexico in the scope of this
20 investigation. Therefore, we come with a strong
21 conviction to make a clear request. Respectfully,
22 we ask you to exclude Mexico from the Section 301

1 investigation on forced labor.

2 In supporting this request, I will
3 emphasize the most critical comments submitted by
4 the Mexican Government.

5 First, Mexico has built, implemented, and
6 expanded a comprehensive system designed
7 specifically to identify, investigate, and prohibit
8 imports of goods produced with forced labor from
9 any country.

10 Second, Mexico has taken substantial
11 concrete and enforceable measures to prohibit and
12 prevent importation of goods produced with forced
13 labor, and continues to strengthen those measures
14 in full alignment with the labor provisions which
15 Mexico, the United States, and Canada agreed under
16 Article 23.6 of the USMCA.

17 Third, Mexico maintains a robust legal and
18 institutional framework prohibiting forced labor
19 under Article 5 of the Constitution and Article 10
20 of the General Law to prevent, punish, and eradicate
21 crimes related to human trafficking, which are
22 implemented with a National Labor Inspection system

1 and administrative and criminal enforcement
2 provisions.

3 In fact, the U.S. Department of Labor
4 recognizes Mexico's progress in strengthening its
5 inspection systems, updating regulations, and
6 increasing penalties, as you can read in the Labor
7 Shield Report 2024.

8 Four, the USMCA forced labor mechanism is
9 a top priority for the Mexican state. For this
10 reason, the mechanism has been fully implemented,
11 strengthened, and enhanced continuously to make it
12 more accessible, transparent, and effective.

13 In 2023, the Mexican Government published
14 the regulation of this mechanism, creating a formal
15 procedure to identify, investigate, and restrict
16 imports of goods produced wholly or partially with
17 forced labor. In 2025, Mexico adopted amendments
18 that substantially expanded the mechanism reach,
19 and operability.

20 Fifth, Mexico has gone beyond regulatory
21 reforms and has implemented at least six operational
22 tools to strengthen the enforcement of the forced

1 labor mechanism.

2 Those measures, I would emphasize only two
3 of them, a comprehensive investigation protocol,
4 ongoing coordination with the United States and
5 Joint Technical Assistance Program between the
6 Mexican labor, the Ministry of Labor and the
7 Department of Labor of the U.S. And, of course,
8 training programs with the International Labor
9 Organization.

10 These measures are active, operational,
11 and directly targeted at preventing forced labor
12 produced goods from entering Mexico and North
13 American market.

14 For this reason, Mexico respectfully makes
15 a firm request to exclude Mexico from this
16 investigation and recognize the extensive measures
17 Mexico has already taken to prevent the importation
18 of goods produced with forced labor.

19 In closing, Mexico expresses concerns
20 regarding the potential negative impact of trade
21 restriction resulting from this investigation.
22 Unilateral trade would be inconsistent with the U.S.

1 obligation under the WTO and the USMCA. Mexico
2 remains firmly committed to eradicating forced
3 labor, protecting workers, and safeguarding the
4 integrity of North America's supply chain.

5 We look forward to continued cooperation
6 with the United States to address current and future
7 challenges our both nations may face.

8 MS. THOMPSON: Mr. Fernandez, your time
9 has expired.

10 MR. ACEVEDO FERNANDEZ: Thank you.

11 MS. YANAGAWA: Thank you for your
12 testimony.

13 Mr. Beteta, the floor is yours.

14 AMBASSADOR BETETA: Thank you, Madam
15 Chair. Distinguished members of the 301 Section
16 Committee, good morning. I'm Hugo Beteta,
17 Guatemalan Ambassador to the U.S.

18 Guatemala maintains a clear and
19 comprehensive legal framework prohibiting forced
20 labor. This framework is continuously
21 strengthened and refined to ensure its
22 effectiveness. This prohibition is grounded on our

1 constitution, including provisions on personal
2 liberty and labor rights, as well as in the Labor
3 Code, which establishes the voluntary nature of all
4 employment.

5 The framework also aligns with Guatemalan
6 international obligations, including the Forced
7 Labor Convention of 1930 and the Abolition of Forced
8 Labor Convention of 1957 of the International Labor
9 Organization. And following the recently signed
10 reciprocal trade agreement with the U.S. and Article
11 27, Guatemala is further strengthening its approach
12 to addressing forced labor in the context of trade.

13 Taking all these elements together,
14 Guatemala provides a coherent normative framework
15 of labor international standards. Guatemala's
16 legal framework is complemented by strategic
17 operational initiatives, particularly at the
18 customs level, to address supply chain risks.

19 The Superintendency of Tax Administration
20 maintains cooperation with the U.S. Customs and
21 Trade and Border Protection, CBP, through
22 mechanisms such as the Container Security

1 Initiative, the Authorized Economic Operator Manual
2 Recognition Framework, the Customs Trade
3 Partnership Against Terrorism, and the Business
4 Alliance for Secure Commerce, BSAC, Certification
5 system.

6 These frameworks incorporate supply chain
7 flexibility, risk management tools, and validation
8 processes for trusted operators.

9 While these instruments were not
10 originally designed exclusively to address forced
11 labor, they provide an existing platform that
12 Guatemala is strengthening to address related
13 risks.

14 At this stage, Guatemala continues to
15 advance and refine its approach to enhancing
16 institutional coordination and evaluating how these
17 frameworks can be further adapted to prevent the
18 importation of potentially -- of goods potentially
19 linked to forced labor.

20 Against this background, Guatemala
21 respectfully submits the following assessment under
22 Section 301 investigation.

1 First, Guatemala approach does not amount
2 to unreasonable or discriminatory conduct with
3 respect to the matters under review, namely the
4 existence and enforcement of measures to prevent
5 the information -- importation of goods produced
6 with forced labor.

7 Second, based on available information,
8 Guatemala has identified no evidence or adverse
9 effects on U.S. commerce such as reduced exports,
10 price distortions, or negative impacts on U.S.
11 workers.

12 Third, Guatemala considers that ongoing
13 efforts and engagement provide a constructive basis
14 to continue addressing these issues and that, in
15 these circumstances, imposition of additional
16 duties or restrictions will be unnecessary and
17 disproportionate.

18 In light of the above, Guatemala considers
19 that the conditions for action under Section 301
20 are not met. Guatemala reaffirms its commitment
21 to addressing forced labor and the continued
22 strengthening of its legal and operational

1 framework. It remains engaged in this process and
2 stands ready to continue a constructive dialogue
3 with a view of enduring, effective, and practical
4 outcomes consistent with international
5 obligations.

6 Thank you.

7 MS. YANAGAWA: Thank you for your
8 testimony.

9 Mr. Roldos, the floor is yours.

10 MR. ROLDOS: Thank you so much. Chair,
11 members of the Board, my name is Leon Roldos, Under
12 Secretary for Foreign Trade Policy of the Republic
13 of Ecuador. Thank you for the opportunity to appear
14 before you today on behalf of the Government of
15 Ecuador.

16 Ecuador shares the conviction that goods
17 produced with forced labor should not enter
18 legitimate markets and that governments must adopt
19 effective measures to prevent, detect and remedy
20 such practices. Forced labor is incompatible with
21 human dignity, fair competition, and sustainable
22 trade. On this fundamental point, Ecuador and the

1 United States of America, are fully aligned.

2 I would like to use my time today to address
3 three main points.

4 First, Ecuador's existing legal and
5 institutional framework against forced labor.

6 Second, the new mechanism Ecuador is
7 developing to address forced labor in imported
8 goods.

9 And, third, our recent bilateral
10 commitment with the United States on this very
11 issue.

12 On my first point, Ecuador's Constitution
13 expressly protects the right to dignified and freely
14 chosen work, work that is voluntary, prohibits
15 forced labor, and requires public institutions to
16 safeguard fundamental rights such as the right to
17 liberty, right to work, and right to dignified work.

18 In this sense, Ecuador has ratified the
19 core international instruments in this area,
20 including ILO Convention Number 29 on forced labor
21 and its protocol, ILO Convention Number 105 on the
22 abolition of forced labor. And I must say that

1 these conventions are also due to our constitutional
2 law. These conventions are directly mandatory to
3 the to the country.

4 In this sense, our domestic legal system
5 criminalizes human trafficking, labor
6 exploitation, and forced labor practices. Our
7 labor authorities exercise inspection and
8 enforcement powers to supervise working conditions
9 and safer workers' rights. In this framework, this
10 is not merely declarative, Ecuador just had a
11 landmark case in the Furukawa case.

12 Ecuador's Constitutional Court recognized
13 severe labor exploitation and practices analogous
14 to slavery affecting agricultural workers back in
15 the latter half of the 20th Century and ordered both
16 reparations for the victims and structural measures
17 to prevent recurrence of this fact.

18 This ruling reflects Ecuador's current
19 active judicial commitment to eradicating forced
20 labor and protected vulnerable workers.

21 For my second point, I would like to state
22 that, at the same time, Ecuador recognizes that the

1 evolution of international trade, which is very
2 dynamic, requires more specific tools to address
3 risks linked to imports and global supply chains.

4 For that reason, the Government of Ecuador
5 has developed a technical proposal for a national
6 mechanism to restrict the importation of goods
7 produced with forced labor. This proposal has been
8 prepared through institutional coordination among
9 the competent authorities, including the Ministry
10 of Labor, the Ministry of Production, the Ministry
11 of Foreign Trade and Customs Authority. This is
12 aligned with the international best practices and
13 our best examples in the region.

14 Under the proposed mechanism, the
15 competent national authorities would be empowered
16 to receive and assess credible information
17 regarding imported goods potentially linked to
18 forced labor, conduct technical review processes
19 in coordination with customs and labor
20 institutions, and where justified, adopt preventive
21 trade measures, including suspension restrictions
22 or denial of entry of affected goods.

1 Lastly, for my third point, I would like
2 to emphasize that, in a recent development, Ecuador
3 has signed an agreement on reciprocal trade with
4 the United States, which, besides certain trade
5 related issues, also emphasizes on work related
6 issues such as the addressing of the imports on
7 forced labor, and also includes a specific mechanism
8 for cooperation between Ecuador and the United
9 States on addressing this matter.

10 This provision reflects a firm commitment
11 between our two countries to advance responsible
12 trade and strengthen labor protections in the
13 practice. And this is a demonstration that we are
14 moving forward with implementation, even before the
15 agreement enters into force.

16 In closing, Ecuador reiterates its firm
17 commitment against forced labor, its commitment to
18 effective enforcement, and its willingness to
19 cooperate in good faith with the United States.
20 We respectfully request that the Committee takes
21 Ecuador concrete action, its legal framework, and
22 it's demonstrated bilateral commitments into

1 account for its report and deliberations.

2 Thank you very much.

3 MS. YANAGAWA: Thank you for your
4 testimony.

5 Mr. Mezarina, the floor is yours.

6 MR. CASTILLO MEZARINA: Thank you, Chair.

7 Good morning. I'm Jose Luis Castillo, Director
8 General for International Trade Negotiations at the
9 Ministry of Foreign Trade and Tourism of Peru.

10 On behalf of the Government of Peru, I
11 participate in this hearing convened by the Section
12 301 Committee reiterating our willingness to engage
13 in technical and constructive dialogue with the U.S.
14 on the issue subject to this investigation. Peru
15 and the U.S. share a longstanding dynamic and
16 mutually beneficial trade relationship,
17 underpinned by the U.S. Trade Promotion Agreement.

18 Regarding the bilateral trade
19 relationship, Peru respectfully submits that the
20 bilateral trade relationship does not reflect the
21 type of harm that the trade measures would be
22 designed to address.

1 According to statistics from the U.S. ITC,
2 in 2025, the total value of goods traded between
3 Peru and the U.S. was approximately \$23.7 billion.

4 This resulted in a U.S. trade surplus with Peru
5 of approximately \$870 million. Over the past 15
6 years, the cumulative U.S. trade surplus with Peru
7 under the trade promotion agreement has reached
8 approximately \$34 billion.

9 The statistics do not support a finding
10 that Peru's current framework has led to a loss of
11 U.S. exports, lower prices for U.S. goods, or
12 suppressed wage for U.S. workers. Any
13 determination of this kind would need to be grounded
14 in concrete and product specific evidence, and Peru
15 is not aware of such any evidence with respect to
16 its trade regime.

17 Regarding Peru's commitments to the
18 eradication of forced labor, Peru has ratified the
19 court ILO instruments, the 1998 ILO Declaration
20 Conventions Number 29, 105, 182, as well as the 2014
21 protocol to Convention Number 29 related to
22 prohibited forced labor.

1 It should be noted that, within the
2 framework of the bilateral free trade agreement,
3 meetings have been held on a series of institutional
4 mechanisms to address, among other issues, labor
5 matters, demonstrating the existence of formal
6 channels of dialogue for monitoring and cooperation
7 in this area. These mechanisms are activated
8 pursuant to the bilateral agreements for U.S., to
9 which only a limited number of countries, including
10 Peru, have access.

11 At the constitutional level, Peru
12 expressly recognizes the freedom to work in its
13 constitution.

14 At the criminal level, the Peruvian
15 Criminal Code classifies forced labor as a criminal
16 offense in addition to disqualification and fines.

17 At the administrative level, the National
18 Superintendency of Labor Inspection, SUNAFIL, has
19 the authority to impose fines for violation related
20 to forced labor.

21 This institutional framework is supported
22 by a documented operational track record. In 2024

1 alone, SUNAFIL carried out over 216,000 preventive
2 actions nationwide related to force and child labor.

3 Peru also has a National Commission for
4 the Fight Against Forced Labor and has implemented
5 three successive national policy plans over the past
6 18 years. This is not a framework created in
7 response to this investigation; it is a product of
8 a sustaining whole-of-governmental commitment.

9 On Peru's ongoing normative effort on
10 import controls related to this matter, Peru
11 recognizes that the specific instrument of a forced
12 labor import prohibition will be a distinct and
13 important complement to its domestic framework.

14 This is why, under the leadership of the
15 Ministry of Foreign Trade and the coordination with
16 the Ministry of Labor, the Ministry of Economy, the
17 Ministry of Foreign Affairs and the National Customs
18 Administration, the Government of Peru has
19 developed a bill that would establish an explicit
20 prohibition on the importation of goods produced,
21 in whole or in part, through forced labor.

22 This bill will be submitted to Congress

1 for approval, after which regulation will be adopted
2 to ensure its enforcement and oversight. It
3 constitutes a concrete, technically grounded, and
4 interagency normative effort, and we look forward
5 to discussing its progress in the bilateral
6 consultations with the USTR.

7 We respectfully request that the committee
8 take into full consideration Peru's legal
9 framework, its institutional track record, the
10 regulatory measures adopted and to be adopted, and
11 the commercially favorable nature of the bilateral
12 relationship.

13 Likewise, Peru considers that the most
14 appropriate and proportionate response to the
15 issues raised in this investigation is to continue
16 the technical dialogue between the parties.

17 The adoption of additional trade measures
18 by the U.S. that could adversely affect Peruvian
19 exporters and workers may not fully reflect the
20 spirit and framework that both countries have
21 carefully built over the past 15 years under the
22 trade promotion agreement.

1 In this regard, Peru considers it
2 appropriate to continue promoting cooperation based
3 on a constructive commitment aimed at preserving
4 and further strengthening the bilateral trade
5 relationship, which is about to celebrate the 200th
6 anniversary.

7 In conclusion, the foregoing demonstrates
8 that Peru has adopted, and continues to adopt
9 measures at addressing issues related to forced
10 labor with political will, thereby evidencing a
11 sustained commitment in this area. Therefore,
12 pursuant to Section 301, the imposition of sanctions
13 on Peru would not be warranted under the present
14 proceeding.

15 Thank you.

16 MS. YANAGAWA: Thank you. We will now
17 proceed with questions from the Government panel.

18 MS. MASTMAN: Good morning. The first
19 question is for Mr. Acevedo Fernandez. Your
20 comments include a list of actions Mexico has taken
21 to strengthen the enforcement of the USMCA forced
22 labor import prohibition commitment.

1 Can you share additional details about
2 Mexico's exploration of mechanisms to strengthen
3 investigations through information exchange and
4 coordination with the United States?

5 MR. ACEVEDO FERNANDEZ: Thank you for your
6 question. And I would like to reiterate what I
7 said, and precisely, the USMCA forced labor
8 mechanism is a top priority for the Mexican state.

9 We have a close coordination with
10 different authorities of the U.S. We have
11 implemented many elements of protocol with 11
12 indicators taken from the International Labor
13 Organization.

14 We have put a website that is very
15 transparent, very -- I would say easy, very friendly
16 so that everyone can put a request of investigation.

17 It could be a Mexican or foreign aid entity. It's
18 step by step.

19 And we have also this joint program with
20 the U.S. authorities that the Ministry of Labor has
21 with the Department of Labor. And we have also
22 technical assistance among both countries. And,

1 of course, we have a very close relationship with
2 the International Labor Organization to make this
3 mechanism much more stronger.

4 Thank you.

5 MS. MASTMAN: Thank you. And I have a
6 follow-up question. You mentioned the website for
7 issuing complaints where complaints can be
8 submitted under the Forced Labor Import
9 Prohibition. Can you provide information on any
10 investigations your government has conducted in
11 response to submissions through this mechanism?

12 And also, has Mexico prohibited the entry
13 of any goods due to forced labor?

14 MR. ACEVEDO FERNANDEZ: It's very
15 relevant, your question. And actually, yes, there
16 is an active investigation currently underway. Of
17 course, by the confidentiality of those
18 investigation, I cannot disclose any information
19 about them. But, yes, we do have.

20 MS. ECHEVERRIA: Thank you for your
21 testimony.

22 This question is for Ambassador Beteta.

1 And has Guatemala established operational
2 frameworks to enforce a forced labor imports
3 prohibition? If so, please describe them?

4 AMBASSADOR BETETA: Thank you for your
5 question. Yes, we have joint task forces in every
6 port of entry. Basically, the Ministry of the
7 Interior, the Ministry of Labor, and the Ministry
8 -- and the for Tax and Customs Administrations.
9 They, of course, go after imported goods that --
10 from companies that have been flagged as a risk.

11 And that's being operational with the support of
12 the U.S. in your own country.

13 I could, of course, provide you with more,
14 you know, a written statement and more details about
15 it, but the mechanism exists. Those mechanisms are
16 being enforced as well through the new reciprocal
17 trade agreement that we just signed which has
18 specific provisions on this issue and also on
19 protecting international recognized Labor
20 Standards.

21 MS. ECHEVERRIA: Thank you. And one
22 follow-up question, Ambassador. Guatemala's

1 comments on the record note several frameworks
2 related to Customs cooperation. Have these been
3 used to address the issue of forced labor, whether
4 in Guatemala or in other countries?

5 Thank you.

6 AMBASSADOR BETETA: I'm aware that
7 there's an intention of using those frameworks in
8 this direction, but I will -- I don't have the
9 specific details, but I know the discussions are
10 ongoing on how to direct those frameworks and the
11 agencies involved into this area of important, you
12 know, goods from what violations and labor rights.

13 So, I will provide that in our written
14 statement as well.

15 MS. ECHEVERRIA: Thank you.

16 MR. RIGBY: Good morning, thank you all
17 for your testimony. This question is for Mr.
18 Roldos.

19 In your testimony and some of the
20 submissions prior to the hearing, you described
21 Ecuador's proposed mechanism to operationalize a
22 ban on imports made with forced labor, as on the

1 one hand, a reactive case-by-case investigative
2 scheme, and, on the other hand, as a preventative
3 and risk-based measure rather than a reactive
4 enforcement mechanism.

5 These two descriptions might seem contrary
6 to each other. Can you please clarify the nature
7 of the proposed implementation mechanism and the
8 extent to which it is reactive and preventive?

9 Thank you.

10 MR. ROLDOS: Yes, thank you for your
11 question. What Ecuador has stated is that it is
12 applying both an ex-ante and an ex-post mechanism
13 for investigating these claims. Also establishing
14 a prohibition on the import of goods produced with
15 forced labor.

16 The extent to which we will address through
17 implementation of, first, cooperation with the
18 United States and third countries regarding
19 information and sharing and investigation
20 capabilities for these issues, technical
21 capabilities, technological capabilities.

22 And also, with the claims for our private

1 sector, other countries regarding specific
2 practices that have been detected for Ecuador to
3 address them and also establish prohibitions on.

4 I can give you more -- a more detailed
5 answer in my comments, given that as of today, the
6 Committee on Foreign Trade, which has to establish
7 the trade regulations regarding this matter, has
8 been summoned to make a decision on this mechanism.

9 So, after that, I can also provide more information
10 on my comments.

11 MR. RIGBY: Thank you very much. And that
12 was -- my follow-up was on the timeline for the
13 proposed implementation mechanism, if you could
14 keep us informed about estimated timelines or
15 deadlines and share when available.

16 MR. ROLDOS: Yes, of course. As I told
17 you, today, the Committee has been summoned. They
18 should take the decision and it should be published
19 on our National Bulletin. It's like the official
20 registry for laws. And then we will proceed to work
21 on its implementation in the following, I would say,
22 90 days, 90 to 120 days with the additional

1 institutions that have -- that are necessary for
2 this purpose.

3 MR. RIGBY: Thank you.

4 MR. HUFFMAN: Thank you. This question
5 is for Mr. Castillo.

6 Peru's comments detail certain
7 international commitments and national laws
8 regarding efforts to combat forced labor
9 domestically and with trade partners.

10 Do these laws, or any other measure
11 maintained by Peru, include authority to collect
12 information on or take action and comment on forced
13 labor that takes place outside of Peru? If so, what
14 is the legal authority and what institutions are
15 involved?

16 MR. CASTILLO MEZARINA: Thank you for the
17 questions. In our submission, we commented on
18 national regulation and international commitments
19 regarding combat on forced labor nationwide
20 internally.

21 But we are working on a bill, and we have
22 already, at the Executive Branch, worked on a bill

1 for prohibiting imports related forced labor.

2 So, that -- at the level of the Executive
3 Branch, we have finalized it, but we have to submit
4 it to Congress for approval. And that's the status,
5 we as - the Executive Branch will submit to Congress
6 for approval.

7 And after approval, the Executive Branch
8 will continue working on the detailed regulation
9 in order to enforce it.

10 MR. HUFFMAN: Thank you. Do you have any
11 sort of timeline on what that process takes?

12 MR. CASTILLO MEZARINA: So, the draft law
13 was worked last week so among different ministries,
14 and so, the Ministry of Labor, the Customs
15 Authority, the Ministry of Economy, Ministry of
16 Foreign Trade and Tourism.

17 So, we have to submit it to Congress. So,
18 we expect that, in the following months, Congress
19 could review it and approve it, but we depend on
20 timelines of Congress.

21 MR. HUFFMAN: Thank you.

22 MS. YANAGAWA: Thank you all for your

1 participation today. Given that we are ending
2 quite early, we would propose to move through lunch
3 and move to the next panel and take a five-minute
4 break to set up for the next panel.

5 This panel is released, thank you. And
6 I would like to add that we'll resume at 11:58 or
7 noon -- let's say at noon.

8 (Whereupon, the above-entitled matter
9 went off the record at 11:52 a.m. and resumed at
10 12:00 p.m.)

11 MS. HASANDRAS: Hello, everyone. We will
12 now proceed with Panel 11. We have some new
13 representatives joining us, so before we begin, I
14 will give them an opportunity to introduce
15 themselves.

16 MS. OETKIN: Hi. I'm Jennifer Oetkin, I'm
17 with the Office of the U.S. Trade Representative.
18 I'm in the Office of Labor Affairs.

19 MR. REID: Nate Reid. I'm with the
20 Department of Homeland Security, Office of Policy.

21 MS. CHERNOV: Betsy Chernov with the
22 Office of Manufacturing and Trade, Small Business

1 Administration.

2 MS. RESNICK: Hi. I'm Bonnie Resnick,
3 Department of the Treasury, Office of Trade and
4 Investment Policy.

5 MR. RIGBY: Crispin Rigby, Department of
6 Labor, Office of Trade and Labor Affairs.

7 MS. HASANDRAS: Thank you. And I'm
8 Rachel Hasandras, Assistant General Counsel with
9 USTR.

10 We will now proceed with testimony from
11 Panel 11. Ms. Zang, you have the floor.

12 MS. ZANG: Thanks for the opportunity to
13 testify today. My name is Michelle Zang. I'm a
14 law professor and serving as external consultant
15 of the China Chamber of International Commerce, the
16 CCOIC.

17 Our member companies are participants in
18 U.S.-China supply chain, supplier to U.S. importers
19 and manufacturers, and direct investors in the
20 United States. So we have a substantial interest
21 in this investigation as it concerns the People's
22 Republic of China. This testimony responds to the

1 questions enclosed in the Notice of Initiation and
2 addresses the legal and evidentiary issues that must
3 be resolved before any determination on the
4 actionability.

5 China maintains a comprehensive legal
6 framework prohibiting forced labor. Domestically,
7 the Chinese Criminal Law, Labor Law, Labor Contract
8 Law provide explicit, solid legal authorities
9 against forced labor. Internationally, China
10 ratified ILO Forced Labor Convention and ILO
11 Abolition of Forced Labor Convention in 2022.

12 China does not maintain a standalone
13 forced labor import ban. However, the absence of
14 this import ban is not an outlier Chinese practice.

15 Instead, it is a regulatory policy choice unique
16 to the United States, not a common practice accepted
17 among the international community of the states.

18 The relevant provisions under Section 301
19 were drafted to address government that tolerate
20 forced labor practice within their territories, not
21 government that failed to adopt a specific format
22 of import control mechanism. To interpret absence

1 of an import ban as persistent pattern of permitting
2 forced labor would transform Section 301 into a
3 mandate for global regulatory harmonization with
4 U.S. standards, which Congress did not authorize.

5 Furthermore, the absence of import ban is
6 not unfair and inequitable. There are no
7 international treaties, conventions, or agreements
8 that require countries to enforce import ban as part
9 of their regimes against forced labor. Instead,
10 major international instruments focus on the
11 elimination of forced labor practice or individual
12 rights against forced servitude, not trade policy.

13 The U.S. specific regulatory tool cannot be
14 considered as a baseline for fairness and equity.

15 At the moment, China is the most heavily
16 tariffed origin in U.S. import history. The
17 investigation must demonstrate what incremental and
18 extra burden China's lack of enforced import ban
19 causing to the U.S. commerce that the current tariff
20 regime has not yet addressed. The Notice of
21 Initiation does not attempt this analysis.

22 The notice also highlights the cost

1 asymmetry caused by forced labor to establish the
2 burdens caused to the United States commerce, the
3 investigation must identify which specific forced
4 labor produced products entered China and which
5 specific U.S. export compete with the mentioned
6 product in the Chinese market. Without such
7 product-specific evidence, the theory of harm
8 appear speculative. Therefore, we respectfully
9 request this investigation as to China should be
10 terminated.

11 As mentioned above, the investigation
12 lacks sufficient legal foundation under Section
13 301. Furthermore, any resulting tariffs from this
14 investigation would not only violate U.S.
15 commitment as WTO, burden U.S. commerce, but also
16 fail to address any forced labor practice at its
17 source.

18 Launched only 19 days after the Supreme
19 Court ruling in Learning Resources, this
20 investigation also raises serious legal questions.

21 If the true purpose is to replace IEEPA tariffs,
22 this pretextual action would be vulnerable --

1 Administrative Procedure Act and the major
2 questions doctrine.

3 If the investigation's genuine purpose is
4 to expand global enforcement against forced labor,
5 more effective and proportionate means do exist,
6 including bilateral negotiation, multilateral
7 engagement through ILO and WTO, as well as technical
8 cooperation with partner countries.

9 Unfortunately, this investigation is not part of
10 them.

11 Thanks for your attention and looking
12 forward to the questions.

13 MS. HASANDRAS: Thank you, Ms. Zang.

14 Ms. Kusumadewi, you have the floor.

15 MS. KUSUMADEWI: Yes, thank you for the
16 opportunity. My name is Ranitya Kusumadewi. I'm
17 the Trade Attache at the Embassy of Indonesia here
18 in Washington, D.C., and I'm here to represent the
19 Government of Indonesia.

20 Chair and members of the Section 301
21 Committee, Indonesia and the United States share
22 a positive and constructive bilateral trade

1 relationship. Our presence here is a testimony to
2 our commitment to promote our economic relations.

3 I would like to, therefore, read the following
4 Indonesia's principled positions regarding the
5 matter we discussed, as contained in our written
6 submission.

7 Indonesia has established a comprehensive
8 and enforceable framework to prevent and eliminate
9 forced labor grounded in criminal law, labor
10 oversight, penal code, labor inspection, and
11 sector-specific governance, and implemented at
12 scale across the national economy. This framework
13 directly addresses the conditions reflected in the
14 ILO's 11 indicators of forced labor by integrating
15 them into inspection, compliance, and enforcement
16 mechanism, ensuring that risks are systematically
17 identified and addressed.

18 This commitment is further reflected in
19 Indonesia's trade regulatory framework. In
20 particular, Indonesia has issued Minister of Trade
21 Regulation Number 9 of 2026, which expressly
22 prohibits the importation of goods produced with

1 forced labor.

2 Indonesia submits that the identification
3 of such indicators, where they arise, leads to
4 corrective and enforcement actions within its
5 domestic system and does not in itself constitute
6 evidence of systematic or tolerated forced labor.

7 Reliance on these indicators are -- as a basis for
8 countrywide trade measures would therefore be
9 inconsistent with their intended purpose and
10 unsupported by evidence.

11 Indonesia's approach remains
12 nondiscriminatory, aligned with international
13 practice, and not associated with measurable
14 distortions to trade or U.S. commerce. It reflects
15 a policy design that is responsive to the global
16 and sector-specific nature of forced labor risks
17 emphasizing prevention, enforcement, and
18 cooperation.

19 Accordingly, Indonesia submits that it
20 should not be subject to any tariffs or measures
21 under Section 301, as such measures are not required
22 where a foreign country has entered binding

1 commitments to address the relevant concerns.

2 Indonesia remains committed to
3 continuously strengthen its framework and engaging
4 constructively with international partners to
5 address forced labor as a shared global priority,
6 while ensuring that any policy response remain
7 transparent, targeted, evidence-based,
8 proportionate, and developed in a manner that
9 respects international obligations and avoids
10 unnecessary restrictions on trade.

11 Thank you.

12 MS. HASANDRAS: Thank you. Mr. Do, you
13 have the floor.

14 MR. DO: Well, hello, good morning,
15 distinguished representatives of the Section 301
16 Committee. My name is Do Ngoc Hung, commercial
17 counselor, Head of Vietnam Trade Office, Embassy
18 of the Vietnam in the United States. And thank you
19 for this opportunity to provide Vietnam's opinion
20 regarding the investigation.

21 So Vietnam and the United States maintain
22 a close and mutually beneficial partnerships,

1 grounded in cooperation, to address shared economic
2 and strategic priorities, including efforts to
3 address forced labor related concerns. As we
4 detail in our written commitments and submissions,
5 Vietnam has established a comprehensive and
6 coherent frameworks to prohibit and eliminate
7 forced labor domestically.

8 At the legal level, forced labor is
9 expressly prohibited under the constitutions and
10 the Labor Code. Violations are subject to both
11 administrative and criminal sanctions, including
12 significant fines and imprisonment. At the
13 institutional level, competent authorities conduct
14 inspections and enforce strict compliance. We use
15 technology solutions to support risk management and
16 enhance traceability in trade flows.

17 Importantly, Vietnam's framework
18 addresses not only forced labor itself, but also
19 the underlying practices that give rise to
20 recruitments, wage withholding, and restriction on
21 workers' freedom of movement.

22 In addition to those domestic efforts,

1 Vietnam engages constructively in the international
2 efforts to eliminate forced labor in global supply
3 chains. And Vietnam is a party to core
4 international labor organizations conventions,
5 including Convention Number 29 on Forced Labor and
6 Convention Number 105 on the Abolition of Forced
7 Labor.

8 Vietnam has also undertaken binding
9 commitments under its major trade agreements to
10 eliminate forced labor, promote trade labor rights,
11 and discourage the importation of goods from other
12 sources produced in whole or in part by forced or
13 compulsory labor. Vietnam is also actively
14 cooperating with U.S. authorities, CBP, in
15 addressing forced labor risks in supply chains.
16 This includes technical exchanges and workshop with
17 CBP and other U.S. agencies, information sharing
18 and dissemination of U.S. regulatory recruitment
19 -- requirements to Vietnamese enterprises.

20 And these cooperative efforts have
21 improved the capacity of enterprises to implement
22 supply chain due diligence and traceability

1 measures. As a result, enterprises operating in
2 Vietnam, including leading global companies that
3 export to the U.S., have adopted robust supply chain
4 controls aligned with UFLPA requirements.

5 With regard to UFLPA, CBP data indicates
6 significant improvement in compliance with the
7 value of Vietnamese shipments linked to forced labor
8 concerns decreasing by approximately 98 percent
9 from \$78.8 million in 2022 to \$1.4 million in 2025.

10 And this shows that the Vietnam current framework
11 is effective in addressing forced labor risks.

12 Regarding forced labor risks in Vietnam
13 exports to the United States, we also know that
14 certain figures cited in other comments for in this
15 -- for this investigation have been exaggerated,
16 and they largely reflect shipments that were
17 ultimately released after being found not to be
18 associated with forced labor.

19 In addition, garments containing cotton,
20 that the only product category identified as a
21 potentially associated with forced labor risk by
22 the U.S. Department of Labor. In practice,

1 however, the majority of cotton used in Vietnam's
2 garment sectors, including for garments exported
3 from Vietnam, is imported from the United States.

4 And, more broadly, Vietnam submits that
5 forced labor in supply chains is a transnational
6 issue that cannot be effectively addressed through
7 unilateral measures alone because of constraint in
8 practical and judicial limitations. And effective
9 enforcement depends on the credible information
10 sharing and cooperation between authorities.

11 In this context, international
12 cooperation, rather than unilateral trade
13 restrictions, provide a more effective and
14 sustainable solutions. In this way, Vietnam is
15 focusing its policy efforts.

16 Regarding this investigation, Section 301
17 requires a showing of unreasonable conduct that
18 burden or restrict U.S. commerce. However, there
19 is no such evidence in this case regarding Vietnam.

20 And as mentioned earlier, we are actively working
21 with the U.S. government to eliminate the risk of
22 goods produced with forced labor from being from

1 being produced in and exported from Vietnam.

2 In our country, we have a highly integrated
3 and mutually beneficial trade and supply chain
4 relationships. And we stand ready to continue our
5 dialogues and technical cooperation to ensure that
6 our trade remains free, fair, and forced labor free.

7 And therefore, we respectfully request that USTR
8 find that no trade action is warranted.

9 And thank you for your attention today.

10 MS. HASANDRAS: Thank you for your
11 testimony. Mr. Hermina, you have the floor.

12 MR. HERMINA: Thank you. Good afternoon.

13 My name is George Hermina, and I have the honor
14 of representing Egypt, a country of 106 million
15 people, a proud strategic partner of the United
16 States for decades, and a country deeply committed
17 to the dignity and the protection of every worker
18 within its border.

19 Egypt and the United States share a common
20 goal, the elimination of forced labor from global
21 commerce. Egypt is already a committed partner in
22 that effort, and that -- this investigation present

1 an opportunity to deepen the cooperation, not
2 fracture it.

3 The question the Committee is asked to
4 answer is whether Egypt has failed to prohibit, to
5 enforce a ban on goods produced with forced labors.

6 The answer is supported not only by Egyptian laws
7 and enforcement, but it's also supported by
8 independent international evidence, the U.S.
9 government data, and a verified enforcement record.

10 Let me begin with Egypt has -- what Egypt
11 has built into its law. The Constitution of Egypt
12 prohibits forced labor at the highest level of the
13 legal order. The anti-trafficking Statute Law
14 Number 64 of 2010 is among the most comprehensive
15 in the Middle East and North Africa region. It
16 criminalizes every form of coercive labor,
17 established specialized prosecutors and dedicated
18 courts, and meets and exceed the Palermo Protocol
19 standard.

20 There are no -- these are not aspirational
21 declarations; they are actively enforced law. They
22 have produced real accountability. I can give many

1 examples. There are 308 defendants that were
2 convicted in forced labor law and trafficking cases,
3 and we have made these submissions and have shown
4 these specific cases.

5 There has been -- Egypt has the control
6 system anchored in Ministerial Decree Number 43 of
7 2016, requires every foreign manufacturer seeking
8 to sell covered goods in Egypt to register, certify,
9 and to be verified by internationally accredited
10 bodies before a single shipment may enter. It's
11 prevention at its source, precisely the outcome that
12 this statute seeks.

13 Laws mean nothing without enforcement.
14 Over the past three years, Egypt's Ministry of Labor
15 deployed inspectors to every government of the --
16 in the country, the manufacturing plant, the textile
17 factories, agricultural sites, and service
18 establishments. There has been approximately
19 990,000 establishments inspected. This covers 6.4
20 million workers, and conviction rates on cases that
21 are brought and prosecuted are 90 percent.

22 Egypt is deeply grateful for the

1 partnership with the United States in strengthening
2 this work. Five hundred and eighty-eight of the
3 labor inspectors have been specifically trained to
4 identify forced labor indicators through a
5 technical cooperation program with the
6 International Labor Organization, which is funded
7 by the U.S. Department of State. That is the
8 definition of bilateral cooperation working as it
9 should.

10 We have submitted examples with our
11 submission of the Court of Cassation, the conviction
12 and imprisonment of defendant who trafficked
13 children to remote farms, forced them to labor, and
14 withheld their wages. Egypt's courts applied the
15 laws without any compromise, and the convictions
16 stand.

17 Now let me show what independent
18 international bodies found when they looked
19 directly at Egypt's export factories. The ILO and
20 the World Bank International Finance Corporation
21 jointly operate Better Work Egypt, an independent
22 assessment program that conducts unannounced

1 two-day factory visits, interview workers directly,
2 and reports its finding without input from the
3 Egyptian Government. In 2023, they assessed 60
4 Egyptian garment factories employing over 56,000
5 workers, and they found zero cases of forced labor.

6 The 2026 National Trade Estimate Report,
7 USTR's own congressionally-mandated comprehensive
8 annual review of foreign trade barriers, contains
9 full chapters on -- a full chapter on Egypt, it
10 surveys, custom procedures, standard certification
11 framework, and market access condition. The 2026
12 NTE raises no labor heading for Egypt, no forced
13 labor allegation, no finding of enforcement
14 failure. The same report names such failures
15 explicitly to other economies.

16 And I know I have to wrap up. We request
17 that the -- respectfully request that this Committee
18 recommends no action under Section 301 and look
19 forward to a deepened partnership with the United
20 States. Thank you.

21 MS. HASANDRAS: Thank you, thank you, Mr.
22 Hermina. Dr. Nedumpara, you have the floor.

1 MR. NEDUMPARA: So, Madam Chair and
2 members of the Section 301 Committee, so thank you
3 for the opportunity to testify today. My name is
4 James Nedumpara, Head of the Centre for Trade and
5 Investment Law established by the Minister of
6 Commerce and Industry in New Delhi, India.

7 I am appearing on behalf of the Government
8 of India in response to the Initiation Notice of
9 Section 301 investigation relating to failure to
10 impose and effectively enforce a prohibition on the
11 importation of goods produced with forced labor.

12 At the outset, India wishes to state that it takes
13 the elimination of forced labor seriously as a
14 matter of constitutional obligation, as a matter
15 of international law, and as a matter of principle.

16 India has ratified ILO Convention Number
17 29 on the Forced Labor, Convention Number 105 on
18 its abolition as well. Article 23 of the
19 Constitution of India prohibits trafficking in
20 human beings and other forms of forced labor, and
21 it's enforceable against both state and private
22 actors.

1 India's domestic legal framework, the
2 Bonded Labor System Abolition Act, 1976, Section
3 140 to 146 of the Bharatiya Nyaya Sanhita, which
4 is the successor to the Indian Penal Code, the
5 Securities and Exchange Board of India, SEBI,
6 Business Responsibility and Sustainability
7 Reporting, BRSR, framework, all these instruments
8 reflect a comprehensive and progressive national
9 commitment on this issue.

10 In light of India's genuine engagement on
11 forced labor issues, India strongly contests the
12 legal and factual basis of this of this
13 investigation. Let me come to the three elements
14 which I would like to highlight.

15 First, the investigation does not satisfy
16 the statutory threshold for self-initiation.
17 Section 332, Section B, Subsection -- Paragraph One,
18 Subparagraph A of the Trade Act of 1974 requires
19 the U.S. Trade Representative to make an initial
20 determination that a specific act, policy, or
21 practice of a foreign country warrants
22 investigation in order to assume or to initiate an

1 investigation. The initiation notice does not
2 identify any such act with respect to India.

3 In light of the fact that no specific act,
4 policy, or practice pertaining to India has been
5 identified, any determination by the USTR regarding
6 the elements of unreasonableness and discrimination
7 is likely to suffer from procedural infirmity and
8 therefore is legally untenable.

9 Notwithstanding the proposition, Section
10 301 of the Act defines unreasonable act, policy,
11 or practice as one which constitutes persistent
12 action or persistent pattern of conduct which
13 permits any form of forced or compulsory labor.
14 The meaning of persistent clearly implies that the
15 conduct of the state should be continuous and must
16 result from willful action or inaction to do
17 something.

18 Further, a state action or inaction can
19 qualify as an attributable conduct under the forced
20 labor standard only within the territory where its
21 effects are felt. Insofar as India's
22 constitutional and statutory framework is

1 concerned, forced labor is prohibited in all its
2 forms within its territory. The absence of an
3 express prohibition on importation of goods
4 produced from forced labor cannot constitute a
5 persistent pattern of conduct on the part of India
6 that permits forced labor in other countries.

7 Second, the appropriate action forum for
8 forced labor standards is the International Labor
9 Organization. The international regime on forced
10 labor is governed by the legally binding framework
11 under the ILO, with a robust and comprehensive
12 supervisory mechanism, periodic reporting
13 obligations, and progressive implementation
14 process. The ILO is uniquely placed to monitor and
15 implement these standards across the -- all ILO
16 members.

17 India notes that a unilateral Section 301
18 action is neither necessary nor appropriate where
19 a comprehensive multilateral framework already
20 exists and where India is an active participant in
21 good standing.

22 The third aspect, the absence of

1 restriction on importation of goods made from forced
2 labor does not confer comparative advantage to
3 Indian exporters and therefore does not establish
4 the element of burden on the United States commerce.

5 Evidence across sectors of major exports of India
6 to the United States does not suggest any linkage
7 with forced labor inputs nor can India's enforcement
8 of forced labor standards be treated as conferring
9 any competitive advantage to Indian exporters to
10 the detriment of the United States industry.

11 In conclusion, in view of the passage of
12 time, I would like to say that the United States
13 make a negative determination with respect to India
14 and should terminate this action. Further, India
15 and the United States are currently engaged --

16 MS. HASANDRAS: Dr. Nedumpara, your time
17 has expired.

18 MR. NEDUMPARA: Yes -- are currently
19 engaged in a bilateral trade negotiation, and this
20 action should be terminated.

21 MS. HASANDRAS: Dr. Nedumpara, I'm sorry,
22 your time is expired. Thank you.

1 MR. NEDUMPARA: Thank you.

2 MS. HASANDRAS: At this time, we will
3 proceed with questions from the Government panel.

4 MS. YU: Good afternoon. This question
5 is directed to Michelle Zang. In your written
6 testimony, you note that most countries do not
7 currently maintain a forced labor import
8 prohibition, yet some do. And we have heard from
9 numerous trading partners about their efforts to
10 either establish or effectively enforce such a
11 mechanism.

12 A few questions here, does China have plans
13 to establish a forced labor import prohibition?
14 If yes, could you describe how the members you are
15 representing are supporting that process? And if
16 not, could you describe the business community and
17 your members' position on establishing a forced
18 labor import prohibition?

19 MS. ZANG: Thanks for the question.
20 Unfortunately, I'm not representing the Government
21 of China, so I have no comment on whether China is
22 establishing any plan on the import ban on forced

1 labor products.

2 And I would like to highlight one point,
3 though, on behalf of CCOIC, the China Chamber of
4 International Commerce, is that, first of all, CCOIC
5 rejects any unfounded accusation of forced labor
6 practice in China. As mentioned, China has
7 established a comprehensive legal framework against
8 forced labor, and the Chinese authority has reacted
9 and investigated reported forced labor practice.

10 Point number two is that the subjects of
11 this investigation is absence of import ban, and
12 import ban is not part of any international
13 obligation imposed on the states of under ILO or
14 under WTO. So we appreciate the regulatory policy
15 in uniqueness of the United States to enforce such
16 a ban, but China is not under the obligation to do
17 so.

18 We are all -- from the perspective of
19 CCOIC, is holding the view that the absence of import
20 ban is not justifiable basis under Section 301 and
21 is not international obligation on part of Chinese
22 Government, and any resulting tariffs will be in

1 violation of WTO law as well as U.S. law alike.

2 Thank you.

3 MS. YU: Thank you.

4 MS. CHERNOV: This question is for Ms.
5 Kusumadewi. The public comments submitted by your
6 government note that Indonesia's Ministry of Trade
7 has just issued a regulation that prohibits the
8 importation of forced labor derived products, as
9 well as stipulates a mechanism for allegation
10 reporting, investigation, and oversight.

11 Can you provide more detail on the time
12 frame and process for fully implementing this new
13 regulation?

14 MS. KUSUMADEWI: Thank you for the
15 question. Correct, that Indonesia has established
16 the Minister of Trade Regulation Number 9 of 2026.

17 This is part of Indonesia's broader domestic
18 regulatory reform agenda, including follow-up
19 measures to the omnibus law on job creation
20 framework starting in 2020 and Indonesia's ongoing
21 effort in the context of its OECD accession process.

22 The regulation provides the legal basis

1 to prohibit the importation of goods produced with
2 forced labor, including mechanisms for reporting,
3 verification, investigation procedures, and
4 oversight, thereby enabling enforcement in the
5 context of importation. And this is supported by
6 Indonesia's broader legal framework that prohibits
7 and criminalizes forced labor, as well as to ensure
8 enforcement through labor, criminal, and human
9 rights law.

10 The technical regulation is currently
11 under development and will be issued in the near
12 term. This is also a priority concern for
13 Indonesia, and more details -- we are ready to
14 provide additional information on this following
15 the hearing, and we remain fully open to continued
16 constructive dialogue with the U.S.

17 MS. CHERNOV: Thank you.

18 MR. RIGBY: Thank you all for your
19 testimony. This question is for Mr. Hung Do. In
20 the public comments submitted by your government,
21 the Government of Vietnam indicated that it does
22 not have a forced labor import prohibition but

1 relies instead on domestic enforcement mechanisms.

2 Would you elaborate on whether the
3 relevant Vietnamese enforcement authorities are
4 able to investigate, prevent, or deny entry of
5 imported goods produced by forced labor?

6 And if you could, please share any examples
7 of Vietnamese authorities detecting and prohibiting
8 imports of goods that are suspected to have been
9 made with forced labor. Thank you.

10 MR. DO: Thank you, Chair. So we would
11 like to elaborate a little bit more on this, I mean,
12 topic. So, Vietnam has robust domestic legal
13 frameworks prohibiting forced labor. The
14 Constitution protects the right to work and
15 prohibits forced labor, like the 2019 Labor Code
16 strictly prohibits and define forced labor in line
17 with ILO Convention Number 29, and the Labor Code
18 and the penal code criminalize forced labor related
19 acts and human trafficking.

20 So Vietnam remains committed to
21 international recognized labor standards and
22 maintain technical cooperation with the U.S.

1 Customs and Border protections.

2 And, for instance, Vietnam regulatory
3 frameworks now require publicly list the companies
4 to disclose their ESG policy in annual reports.

5 And, notably, most U.S. importers require that their
6 suppliers adopt international standards like
7 SA8000, particularly in high-risk sectors such as
8 textile, garments, and leathers, reflecting a
9 strong private sector shift towards ethical supply
10 chain.

11 And if we look at the data, I mean shown
12 by CBP, so in 2022 we got the concern over the
13 shipment associated with forced labor from --down
14 from \$78 million down to \$1 million in 2025, and
15 only \$218,000 in the first four months of 2026.

16 And this demonstrates improved internal controls
17 and proactive compliance by Vietnamese industries.

18 And we do have CMAA cooperation with CBP, and we
19 are looking forward to a productive engagement and
20 consultation with the U.S. government.

21 MR. RIGBY: Great, thank you very much.

22 MS. RESNICK: This question is for Mr.

1 Hermina. The written submission asserts that
2 Decree 43 of 2016, among other measures, achieves
3 the same functional outcomes as an import ban,
4 namely through a series of certification
5 requirements.

6 A few questions, can you direct us to the
7 specific provision of the decree or other instrument
8 which speaks to labor and forced labor requirements?

9 Are foreign goods produced with forced labor
10 classified as non-compliant goods under the law?

11 And finally, has Egypt prohibited the entry of any
12 goods due to forced labor?

13 MR. HERMINA: I apologize, I couldn't hear
14 the specific --

15 MS. RESNICK: Sure, I can repeat. So, a
16 few questions, can you direct us to the specific
17 provision of Decree 43 of 2016 or other instrument
18 which speaks to labor and forced labor requirements?

19 And then are foreign goods produced with forced
20 labor classified as non-compliant goods under the
21 law? And has Egypt prohibited the entry of any
22 goods due to forced labor?

1 MR. HERMINA: Yes, with regard to the law,
2 I believe we've submitted in the attachment. If
3 we did not, I will be glad to supply that. With
4 regard to Egypt's prohibition on imports, we have
5 -- Egypt has a significant registration framework
6 for pre-import registration manufacturer with
7 documented verification of the legal identity,
8 production scope, and a quality control system.
9 Egypt only registers certified manufacturers that
10 can export. The system creates the traceable,
11 auditable records of the sources of all covered
12 imports.

13 On the export side, Egypt, and
14 particularly in the apparel and the home textile,
15 Egypt maintains documented supply claims at four
16 levels, and those are consistent, by the way, with
17 the U.S. CBP record-keeping requirements, the
18 transaction level, at the supplier level, at the
19 production level, and the shipment level.

20 In addition, the QIZ companies that
21 operate under the U.S. Custom Border Protection
22 align documentation standard the same standard as

1 U.S. CBP. QIZ factories maintain comprehensive
2 documentation, including raw material records,
3 purchase orders, invoices, bills of lading,
4 receiving record, and they do that for a period of
5 five years. So all of these records are maintained
6 for all -- everything that's coming into the country
7 and leaving the country.

8 MS. HASANDRAS: This question is for --
9 (Simultaneous speaking.)

10 MS. HASANDRAS: Mr. Hermina, just a quick
11 follow-up question for you. The decree you cite,
12 law 40 -- Decree 43 appears to concern trademarks.
13 Is there a particular provision concerning forced
14 labor that we can reference?

15 MR. HERMINA: Again, I'm sorry. I can't
16 hear.

17 MS. HASANDRAS: The law you referenced,
18 Decree 43, appears to concern trademarks. Is there
19 a particular provision concerning forced labor that
20 we can reference?

21 MR. HERMINA: The law -- again, I believe
22 we've supplied that in the attachments. If we have

1 not, I will make sure that we attach that.

2 MS. HASANDRAS: Thank you.

3 MR. HERMINA: Thank you.

4 MS. CHERNOV: The next question is for
5 Professor James Nedumpara. In your written
6 comments, you note that across several industries
7 there has been an adoption of responsible sourcing,
8 supply chain monitoring, and zero tolerance
9 policies. Do Indian laws or regulations require
10 industries to employ these practices, or are these
11 voluntary practices, self-imposed by industry
12 itself?

13 If violations are found, is there any
14 obligation for companies to report findings to the
15 Government of India? And what actions does the
16 government take in response?

17 MR. NEDUMPARA: Thank you, Madam, for that
18 question. So I recall one statement in the last
19 TVPRA report that mentions that tracing forced labor
20 incidents in third countries is not an easy task.

21 And India's approach has been consistently a kind
22 of a soft, slow approach.

1 In our written submission, we very clearly
2 mentioned that the Securities and Exchange Board
3 of India has adopted the BR, it's our regulations
4 of the framework that is -- that is not hard law,
5 but it is actually a kind of a soft law. And our
6 approach has been to encourage the industry to go
7 for third-party reports, global certification,
8 traceability systems, and responsible sourcing.

9 Some of these requirements are encouraged
10 through government framework. So that is why we
11 refer to the SEBI BRSR. And there is another
12 instrument called the National Guidelines on
13 Responsible Business Conduct, the NGRBC, that also
14 provides a voluntary framework.

15 In addition to that, the government has
16 been supporting various export promotion councils
17 which are funded by the government in order to
18 identify the incidents of forced labor or child
19 labor in third countries and make sure that the
20 supply chains are made clean.

21 Thank you. We can also provide additional
22 in our second submission.

1 MS. CHERNOV: Thank you.

2 MS. HASANDRAS: No more questions from
3 this panel. This concludes Panel 11.

4 Just as a reminder, the USTR comments
5 portal is now open and accepting post-hearing
6 rebuttal comments until May 6th. Thank you to our
7 witnesses for your views and for your testimony,
8 and thank you for your interest in participating
9 in this hearing. We're adjourned.

10 (Whereupon, the above-entitled matter
11 went off the record at 12:38 p.m.)
